 NG Connector Selection Guide

NUCLEAR-GRADE QUICK-DISCONNECT CONNECTORS SuperNG, Mighty Mouse NG, ITS-NG, and IPT SE-NG

Designed for Containment Area (Class 1E)
 Nuclear Power Plant Applications

Glenair offers four connector series engineered in accordance with nuclear industry standards for containment area class 1E. Series SuperNG and Mighty Mouse NG are suitable for use in new plants with the most stringent zone 1E qualification standards. Series ITS-NG and IPT SE-NG are suitable for use in older plants undergoing retrofit or refurbishment.

- The entire family of Glenair NG interconnect solutions is manufactured in an NQA-1 (10CFR50 Appendix B) qualified manufacturing quality and traceability system
- Full audit report and auditor statement of compliance available
- ASME NQA-1 : Quality Assurance Program Requirements for Nuclear Facility Applications in place. Quality controls include "down-to-the-molecular-level" analysis for all raw materials ensuring Glenair's total control over all aspects of fabrication employed in our NG series connectors.

SuperNG
 Double Peripheral Seal Quick-Connect Series for Stringent Class 1E Containment Area Applications

Mighty Mouse NG
 Ultraminiature High-Pressure Quick-Connect for New Plant Class 1E Containment Area Applications

ITS-NG
 Series ITS (5015 Type) Reverse-Bayonet Quick-Connect for Existing Plant Class 1E Refurbishment and Retrofit Applications

IPT SE-NG
 Series IPT SE (26482 Type) Bayonet-Lock Quick-Connect Connectors for Existing Plant Class 1E Refurbishment and Retrofit Applications

Qualification and Test Capabilities
 In-House Independent Test Laboratory

CLASS 1E
SuperNG

Double peripheral seal reverse-bayonet connectors designed to meet the latest, most stringent global Zone 1E qualification standards including those requiring long-term submersion

Glenair SuperNG connectors have been designed to withstand the most stringent LOCA qualification criteria, including those requiring long-term submersion, 60-year thermal cycle simulation, and long-term radiation exposure. SuperNG utilizes machined stainless steel shells and polymeric insert materials for maximum resistance to cumulative radiation, thermal, seismic, and pressure for class 1E harsh nuclear environments. Double peripheral seals ensure life-of-system environmental performance.

Built with proven reverse-bayonet technology for rapid mating and demating during maintenance cycles, and support for the broad range of military 5015 insert arrangements, the connectors can be configured in small shell sizes with as few as two signal contacts, all the way up to large size shell sizes accommodating over sixty 20-amp power contacts. Need a single 500 amp power contact layout for a three-phase motor application? The Series SuperNG supports that too.

Wire-to-connector termination is facilitated with precision-machined crimp or solder-cup contacts with ample wiring space in the connector housing for back-potting or environmental shrink boot accommodation.

Signature double O-ring peripheral seal

- Machined / passivated stainless steel shells
- Available EMC grounding fingers for improved shell-to-shell resistance
- Stainless steel backshells suitable for band termination and backpotting
- NPT threaded plugs and receptacles
- Radiation-hardened inserts, gaskets, seals, O-rings
- Standard signal, power or thermocouple contacts
- Polarization keys and keyways

KEY PERFORMANCE ATTRIBUTES: Glenair SuperNG Connectors

Glenair SuperNG connectors are optimized for containment area (Class 1E) applications in modern nuclear power plants with stringent LOCA test and performance requirements including radiation resistance, high-temperature tolerance, sealed, high-pressure tolerance, fluid/chemical resistance, and corrosion resistance. Radiation-hardened inserts, gaskets, seals, and O-rings ensure 60-year life-of-system performance and are manufactured in accordance with a 10CFR50 Appendix B quality system.

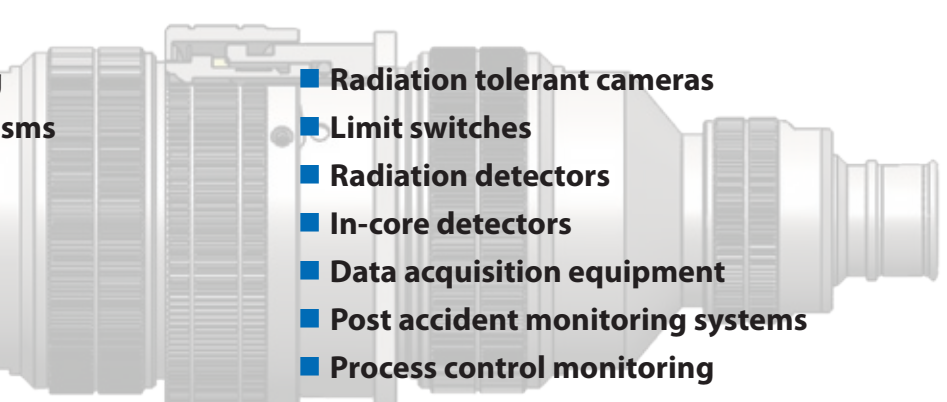

Test	Zone 1 Requirements
Vibration aging	90 minutes of vibration each orthogonal axis, no discontinuity of 1 ms or greater, sinusoidal motion 0.75 g from 5 Hz to 100 Hz to 5 Hz
Thermal cycling	13 cycles between 30°C [86°F] and 121°C [250°F]
Mechanical cycle aging	500 mating/un-mating cycles
Environmental Requirements (Temperature and Pressure)	Normal Operating Conditions: Normal Temperature: (10 - 48.9°C) [50 -120°F] Normal Pressure: -0.001 +0.007 Mpa [-0.2 +1.0 psig] Group 1 Abnormal Operating Conditions, 18 4-h events: Abnormal Temperature: (10 - 65.6°C) [50 -150°F] Abnormal Pressure: Atmospheric Group 2 Abnormal Events Operating Conditions, 1-5 30-day events: Abnormal Temperature : (10 - 121°C) [50 - 250°F] Abnormal Pressure: ≤ 0.124 Mpa [≤18 psig]
Normal Service Radiation	60-Year Equivalent Gamma Total Integrated Dose= 4,12 E+07 rads [412 kGy]
Total Accumulated Dose (TAD)	250 MRads (2.5 X 10 ⁸)
Seismic test	In accordance with IEEE 344 and IEEE 382, max peak value 6.5g
Thermal Aging	Qualified Life 60 years
Containment pressure test	4.7 bar [68 psig] for 24 hours
DBA (LOCA) Test	DBA Operating Conditions in 1-year-long event: Maximum Accident Temperature (for aprox. 3 s): 216.7°C [422°F] Maximum Accident Pressure (for aprox. 3 s): 406.8 kPa [59 psig] Post Accident Gamma Total Integrated Dose for 1 year = 3.7 E+07 rads [370 kGy] Post Accident Beta Total Integrated Dose for 1 year = 2.6 E+08 rads [2600 kGy] Chemical Spray 30 hours Post DBA 30 days in chemical spray fluid
Post DBA test	1-year long immersion as per IEEE 383:09-2015, water at 85.2°C [185.38°F] pressure 0.11 Mpa [16.62 psig]

GLENAIR SuperNG ZONE 1 INTERCONNECT APPLICATION SUPPORT

SuperNG is optimized for equipment applications in containment area Class 1E including:

- Valve controls/monitoring
- Control rod drive mechanisms
- Rod position indicators
- Pressure transmitters
- Solenoids
- Hydrogen detectors
- Fuel handling equipment
- Radiation tolerant cameras
- Limit switches
- Radiation detectors
- In-core detectors
- Data acquisition equipment
- Post accident monitoring systems
- Process control monitoring

NUCLEAR-GRADE QUICK-DISCONNECT CONNECTORS
**Double Peripheral Seal Interconnect for Stringent
 Containment Area (Class 1E) Applications**
 SuperNG connectors with NPT adapter

NUCLEAR-GRADE QUICK-DISCONNECT CONNECTORS
**Double Peripheral Seal Interconnect for Stringent
 Containment Area (Class 1E) Applications**
 SuperNG connectors with environmental cable clamp

SuperNG RECEPTACLE AND PLUG WITH NPT ADAPTER

SuperNG RECEPTACLES AND PLUG WITH 'CLASS C' ENVIRONMENTAL CABLE CLAMP (N5)

NUCLEAR-GRADE QUICK-DISCONNECT CONNECTORS
**Double Peripheral Seal Interconnect for Stringent
 Containment Area (Class 1E) Applications**
 SuperNG connectors with shield termination backshells

NUCLEAR-GRADE QUICK-DISCONNECT CONNECTORS
**Double Peripheral Seal Interconnect for Stringent

CLASS 1E

Ultraminiature Mighty Mouse NG

High-pressure small form-factor connectors designed to meet the latest, most stringent global Zone 1E qualification standards including those requiring long-term submersion

High density, small form-factor Mighty Mouse NG connectors are designed for use in new nuclear power plant containment zone (class 1E) equipment. Series 802 Mighty Mouse NG connectors are built to meet the most severe nuclear industry test requirements, including long-term submersion, radiation, and 60-year thermal cycle simulation. The series is available in ten sizes from 1 to 130 contacts.

These ultraminiature connectors (fully half the size and weight compared to standard nuclear-grade connectors) feature high-density inserts, 316 stainless steel shells and a piston O-ring for high-pressure, 3500 psi sealing. Gold-plated crimp contacts accept #12 - #30 AWG wire. Connectors are backfilled with epoxy potting compound to achieve an open face pressure rating 1000 PSI.

Custom high-pressure glass sealed and bulkhead feed-thru versions available, consult factory.

- 3500 psi pressure rated
- Ultraminiature #23 contacts
- Size #20, #20HD, #16, #12, #8 signal, power, fiber optic and shielded contacts
- Discrete connectors and turnkey cable assemblies

Series ITS-NG

CLASS 1E

Series ITS-NG Reverse-Bayonet Coupling

Nuclear industry standard power and signal connectors for existing plant refurbishment

Glenair ITS-NG series connectors meet previous-generation nuclear industry LOCA test requirements and are suitable for equipment retrofit and refurbishment applications for power plants with legacy containment zone 1E requirements. These industry-standard reverse bayonet lock connectors offer fast and reliable mating and demating. The Nuclear-Grade ITS series connector is Glenair's qualified equivalent for MIL-DTL-5015 (VG95135)

reverse-bayonet connectors. The popular series offers hundreds of crimp-contact power and signal insert arrangements with gold-plated copper contacts. Polymeric insert materials deliver maximum radiation and temperature tolerance, as well as long-term durability. Stainless steel, environmentally-resistant materials are fabricated in accordance with NQA-1 (10CFR50 Appendix B). All material selections meet cumulative radiation, thermal, seismic, and pressure-induced stress factors for legacy class 1E harsh nuclear environments.

Discrete connectors or turnkey cable assemblies

- Fast connect / disconnect reverse-bayonet coupling
- High corrosion-resistant stainless steel shells and bodies
- Chemical and moisture-resistant inserts and O-rings
- Performance tested for advanced temperature, radiation, and seismic stress factors
- Ideally suited for power generation monitoring, valve control devices, sensors, and other electronic equipment in Class 1E harsh nuclear / safety-related applications

NUCLEAR-GRADE QUICK-DISCONNECT CONNECTORS Reverse-Bayonet (5015 type) Interconnect for Legacy Containment Area (Class 1E) Applications Series ITS-NG applications and specifications

GLENAIR SERIES ITS-NG APPLICATION NOTES

- Glenair Series ITS-NG connectors are based on the MIL-DTL-5015 standard, but feature an improved reverse-bayonet coupling technology in place of the threaded interface used in MIL-DTL-5015.
- The ITS-NG family of connectors features improved O-ring sealing and other design enhancements for applicability in containment area (Class 1E) / safety-related applications, particularly in existing or older nuclear facilities with legacy LOCA test requirements. For new interconnect applications in modern-day power plants, Glenair recommends the SuperNG or Mighty Mouse NG series connectors currently undergoing qualification to the latest LOCA test and long-term durability requirements.
- ITS-NG is an industry-standard connector design, intermateable and intermountable with all other 5015-based reverse-bayonet connector series. The ITS-NG is considered particularly appropriate for retrofit and refurbishment applications as the 3-point bayonet coupling mechanism reduces mating time—an important consideration in time-sensitive plant refurbishment work. Positive locking of the three stainless steel pins provides reliable resistance to vibration and shock, and prevents connector de-coupling in severe vibration applications.
- Both plug and receptacle connector configurations are available with dynamic peripheral seals for environmental sealing. Equipped with appropriate backshells and accessories, the connectors are submersible for up to 1 year at 85°C to 1m depth.
- Glenair Series ITS-NG connectors share the same insert arrangements, shell dimensions, supported contacts, and electrical performance ratings as MIL-DTL-5015 and VG 95234 and are fully interchangeable with VG standard connectors.
- Glenair ITS-NG connectors are particularly well-suited for use in applications where electromagnetic compatibility is a requirement. A complete range of EMI shield termination accessories is available for both overall as well as individual wire shields.

CLASS 1E

Series IPT SE-NG Bayonet-Lock Connectors

For Westinghouse, CANDU and GE Nuclear MIL-DTL-26482-based installations

Glenair Nuclear-Grade IPT SE Bayonet-Lock Signal Connectors are ideally suited for general and Class 1E harsh environment nuclear applications where reliable mating and quick connection and disconnection of safety zone connectors is required.

The nuclear-grade concept of the VG95328 bayonet mechanism provides fast and easy coupling, especially when the connector is situated in an awkward or hard to reach location.

Supplied crimp contacts are gold-plated copper alloy. Inserts are made from high-insulation synthetic rubber, high-temperature and radiation resistant from -40°C to +125°C.

Intermateability

Nuclear-Grade Series IPT SE connectors are interchangeable and intermateable with the wide range of industry-standard bayonet connectors designed around MIL-DTL-26482 Series I and/or qualified to VG 95328.

Glenair can also accommodate custom changes and modifications to meet compatibility requirements with previously installed legacy connectors.

MAIN TECHNICAL CHARACTERISTICS

- High-performance crimp version with integral contact retention clips
- Two contact sizes: #20 and #16
- 21 signal contact insert arrangements, 3 to 61 contacts
- Rear-insertion/front release snap-in contacts
- Intermateable with other MIL-DTL-26482 Series I connectors
- Environmentally sealed system
- Audible and visual coupling indicators
- Keyed polarization

Environmental Zone 1 Qualification

ENVIRONMENTAL ZONE 1 QUALIFICATION

Glenair recently reached an important milestone with the qualification of a cable assembly program for a major global nuclear client. Included in these assemblies were our Mighty Mouse NG plug/receptacle connectors, EPDMO-Rings, and Glenair's proprietary epoxy resin.

Testing followed "CEI 60780:1998 Nuclear Power Plants – Electrical Equipment Of The Safety System – Qualification".

Dry heat thermal aging totaling 1 month at 120 °C as per EN 60068-2-2:2007, 24h dampheat at 95% RH as per 60068-2-78:2013,

Irradiation 67 kGy of 60Co as per EN 60544-2:2012,

Seismic testing as per CEI 60980:1989 and CEI 60068-2-57:2013,

Watertightness for 24h under 2 bar as per EN 60068-2-18:2001.

Testing required a 52-year lifespan condition, final electrical testing confirmed that the assemblies would perform their job flawlessly over the required period.

132 °C for 770h, representing a 60 year-long lifespans, and watertightness testing at 8 bar for 24h, as per IEEE 572:2006 /MIL-DTL-5015H / VG95328-1:12/96.

Upcoming product qualification will have our connectors undergo the following: 60-Year Equivalent conditions inside Zone 1 harsh environment.

Thermal cycling between 30 °C and 121 °C

Mechanical aging, thermal aging at 120 °C

Normal Service and DBA radiation aging totaling 4,12 E+07 rads of Gamma Dose Vibration Aging and Seismic Testing as per IEEE 344, IEEE 323 and IEEE 382

Containment Pressure Test at 4,7 bar for 24 h

Design Basis Accident (DBA) and Post DBA Test -with such extremes as max. Temp 216,7 °C

Max, 30h-long chemical spray

1-year long immersion in water.

AP1000 Environmental Zone 1 Qualification

Test	Zone 1 Requirements
Vibration aging	90 minutes of vibration each orthogonal axis, no discontinuity of 1 ms or greater, sinusoidal motion 0,75 g from 5 Hz to 100 Hz to 5 Hz
Thermal cycling	13 cycles between 30 °C [86 °F] and 121 °C [250 °F]
Mechanical cycle aging	500 mating/un-mating cycles
Environmental Requirements (Temperature and Pressure)	Normal Operating Conditions: Normal Temperature: (10 - 48,9 °C) [50 -120 °F] Normal Pressure: -0.001 +0.007 Mpa [-0.2 +1.0 psig]
	Group 1 Abnormal Operating Conditions, 18 4-h events: Abnormal Temperature: (10 - 65,6 °C) [50 -150 °F] Abnormal Pressure: Atmospheric
	Group 2 Abnormal Events Operating Conditions, 1-5 30-day events: Abnormal Temperature : (10 - 121 °C) [50 - 250 °F] Abnormal Pressure: ≤ 0.124 Mpa [≤18 psig]
Normal Service Radiation	60-Year Equivalent Gamma Total Integrated Dose= 4,12 E+07 rads [412 kGy]
Total Accumulated Dose (TAD)	250 MRads (2.5 X 10 ⁸)
Seismic test	In accordance with IEEE 344 and IEEE 382, max peak value 6,5g
Thermal Aging	Qualified Life 60 years
Containment pressure test	4,7 bar [68 psig] for 24 hours
DBA (LOCA) Test	DBA Operating Conditions in 1-year-long event: Maximum Accident Temperature (for aprox. 3 s): 216.7 °C [422°F] Maximum Accident Pressure (for aprox. 3 s): 406.8 kPa [59 psig] Post Accident Gamma Total Integrated Dose for 1 year = 3,7 E+07 rads [370 kGy] Post Accident Beta Total Integrated Dose for 1 year = 2,6 E+08 rads [2600 kGy] Chemical Spray 30 hours Post DBA 30 days in chemical spray fluid
Post DBA test	1-year long immersion as per IEEE 383:09-2015, water at 85,2 °C [185,38 °F] pressure 0,11 Mpa [16,62 psig]

ISO/IEC 17025

Environmental Test Laboratory

Fast and Reliable IEC Qualified Assessment Laboratory for Electronic Components (IECQ)

Environmental testing, consisting of the complete range of mechanical, electrical and environmental stress factors that affect electronic equipment, cabling, and systems is now available from Glenair's IEC/IECQ certified testing laboratories. Test engineers and technicians follow qualified processes, and report generation protocols to deliver timely and professional environmental testing services. As an interconnect component manufacturer and wire and cable assembly supplier, Glenair is well-versed in all aspects of qualification testing including corrosion resistance, solvent resistance, electromagnetic compatibility, dielectric withstanding voltage, current rating and so on. Our test laboratories are equipped with current-generation equipment, and are maintained in accordance with industry best practices and certification agency requirements. Perhaps most importantly, Glenair environmental test services are offered with accelerated lead

times—from initial quoting to final test report delivery. Please contact the factory for more information

- Mechanical / dynamic testing for fiber optic systems, electrical components, wiring harnesses
- Broad spectrum of electrical testing (resistance, current rating, EMC shielding and more)
- Heat, cold, and thermal shock testing
- Corrosion and solvent resistance testing
- Fast turnaround on quotes and testing services
- Decades of experience

IECQ Certificate of Approval
Independent Testing Laboratory

IECQ Certificate No.: IECQ-L BSI 13.0001 Issue No.: 2 Status: Current
 Supersedes: IECQ-L BSI 13.0001 Issue 1 Issue Date: 2016/11/07 Org Issue: 2013/11/07
 CB Reference No.: T598257 IECQ Expiration: 2019/11/06

Glenair Italia S.p.A.
Via Dei Lavori, 7
Quarto Inferiore, Granarolo dell'Emilia
Bologna, 40057
Italy

The organization, facilities and procedures have been assessed and found to comply with the applicable requirements for Independent Testing Laboratory organization approval, in support of the IECQ system, which is in accordance with the Basic Rules IECQ 01 and Rules of Procedure IECQ 03-6 "Independent Testing Laboratory Assessment Program Requirements" of the IEC Quality Assessment System for Electronic Components (IECQ) and applicable requirements of ISO/IEC 17025: 2005 for the testing of electronic components under the IECQ.

Scope:
 Attached Schedule: T598257 IECQ scope issue 2.pdf

Approved by Certification Body (CB): BSI
 Kitemark Court, Davy Avenue
 Knowlhill, Milton Keynes MK5 8PP
 United Kingdom
 Authorized person:
 Paul Turner

The validity of this certificate is maintained through on-going surveillance audits by the IECQ CB issuing this certificate.
 This Certificate of Conformity may be suspended or withdrawn in accordance with the Rules of Procedure of the IECQ System and its Schemes.
 This certificate and any schedule(s) may only be reproduced in full.
 The certificate is not transferable and remains the property of the issuing IECQ CB.
 The Status and authenticity of this certificate may be verified by visiting www.iecq.org

Schedule of Scope to Certificate of Approval
Independent Testing Laboratory

IECQ Certificate No.: IECQ-L BSI 13.0001
 CB Certificate No.: T598257 IECQ

Schedule Number: IECQ-L BSI 13.0001-S Rev No.: 2 Revision Date: 2016/11/07 Page 1 of 1

CONDITIONING TESTS

ENVIRONMENTAL	Test	BS EN 60068 / IEC 60068
Cold	Test A	60068-2-1
Dry Heat	Test B	60068-2-2
Damp Heat – Steady State	Test Cab	60068-2-78
Damp Heat – Cyclic	Test Db	60068-2-30
Change of Temperature	Test N	60068-2-14
Salt Mist	Test Ka	60068-2-11

MECHANICAL	Test	60068-2-6
Vibration, sinusoidal	Test Fc	60068-2-6
Vibration, random	Test Fh	60068-2-64
Shock	Test Ea	60068-2-27

CONNECTORS FOR ELECTRONIC EQUIPMENT	Test	BS EN 60512 / EN 60512
Contact Resistance	Test 2a	BS EN 60512-2-1
	Test 2b	BS EN 60512-2-2
Housing (Shell) Electrical Continuity	Test 2f	BS EN 60512-2-6
Insulation Resistance	Test 3a	BS EN 60512-3-1
Voltage Proof	Test 4a	BS EN 60512-4-1
Temperature Rise	Test 5a	BS EN 60512-5-1
Current-temperature derating	Test 5b	BS EN 60512-5-2

Shielding Effectiveness
 BS EN / IEC 62153-4-7

MEASUREMENT CAPABILITIES (Parameters)
 DC Voltage, DC Current, AC Voltage, AC Current, DC Resistance, Temperature, Humidity.

ELECTRICAL PRODUCT TESTS
 Resistors, Printed Circuits, Switches, Relays, Connectors, Transformers, Electrical Harnesses

This schedule is only valid in conjunction with the referenced Certificate of Approval.
 This approval and any schedule(s) may only be reproduced in full.
 This approval is not transferable and remains the property of the issuing body.
 The Status and authenticity of this approval and any schedule(s) may be verified by visiting the Official IECQ Website: www.iecq.org
