

Connector Adapters and Transitions

Glenair MIL-DTL-38999 Series III (H code) Adapters and Transitions provide a universal solution to conduit routing and connector accommodation in multi-branch conduit assemblies. The teeth create a locking interface when combined with a self-locking backshell or fitting. These adapters and transitions may be used with any of the do-it-yourself adapters and fittings in this book that have MIL-DTL-38999 Series III (H code) threads and teeth, and provide environmental protection when combined with an environmental H code backshell or fitting.

Other Adapters and Transitions provide a quick and easy solution for conduit routing when a locking interface is not needed. This system of adapters and transitions has the advantage of being available in much larger shell sizes for use with conduit up to 2¾ inches. They provide an environmental interface when used with any of the do-it-yourself transition fittings in this book.
