

Got a light?

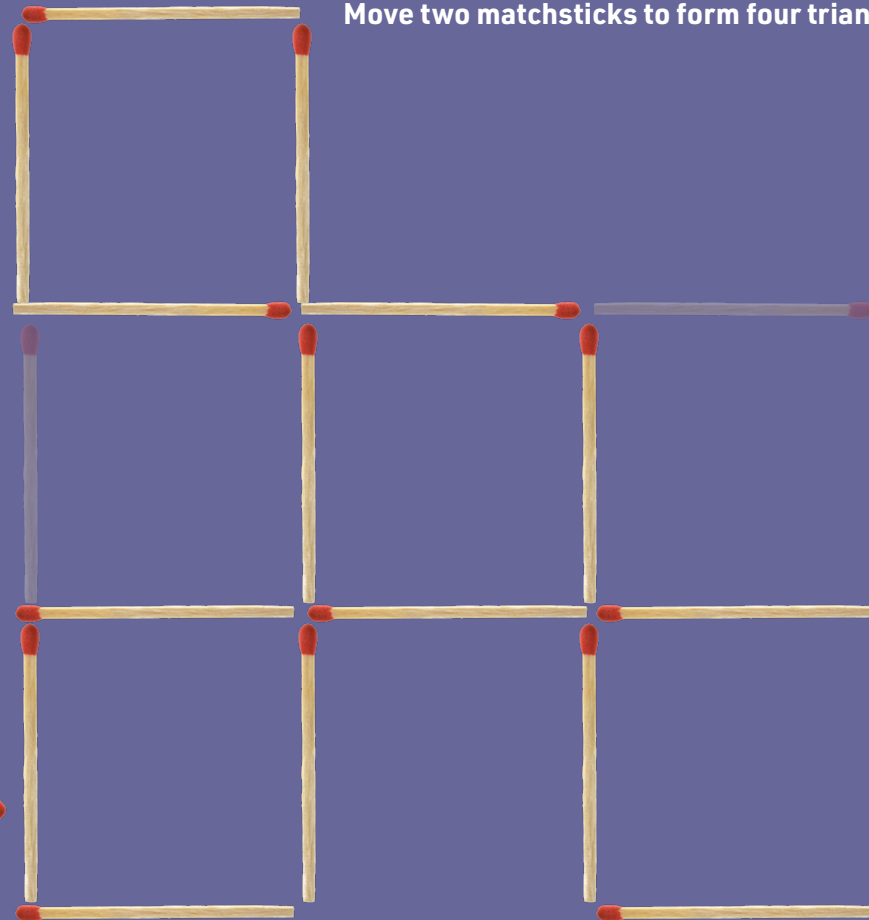

Change three matchsticks into six without breaking any of them

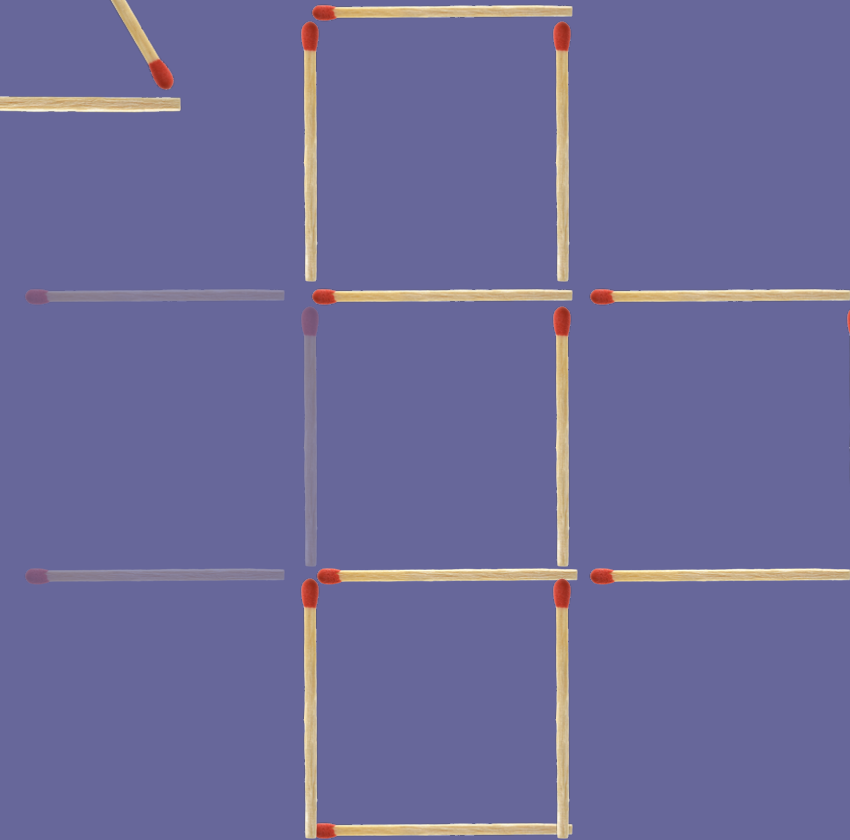

Move four matchsticks to make three equilateral triangles

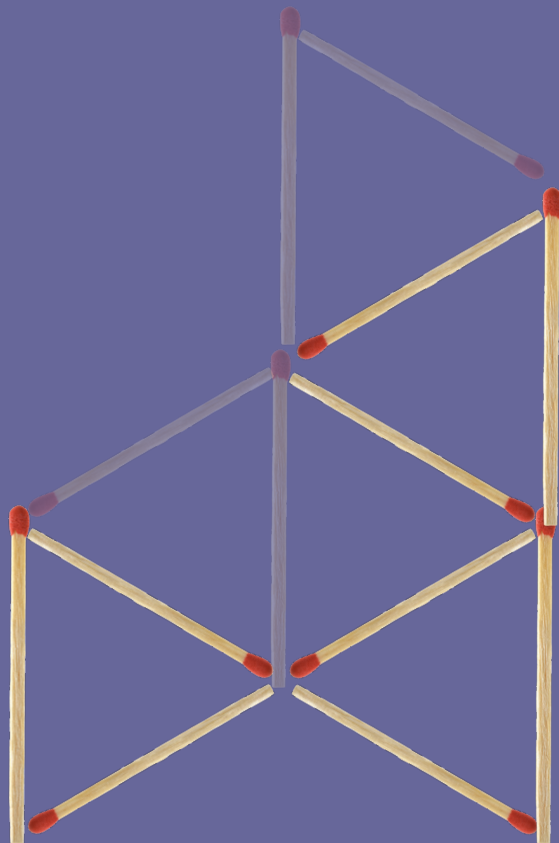

Move two matchsticks to form four triangles

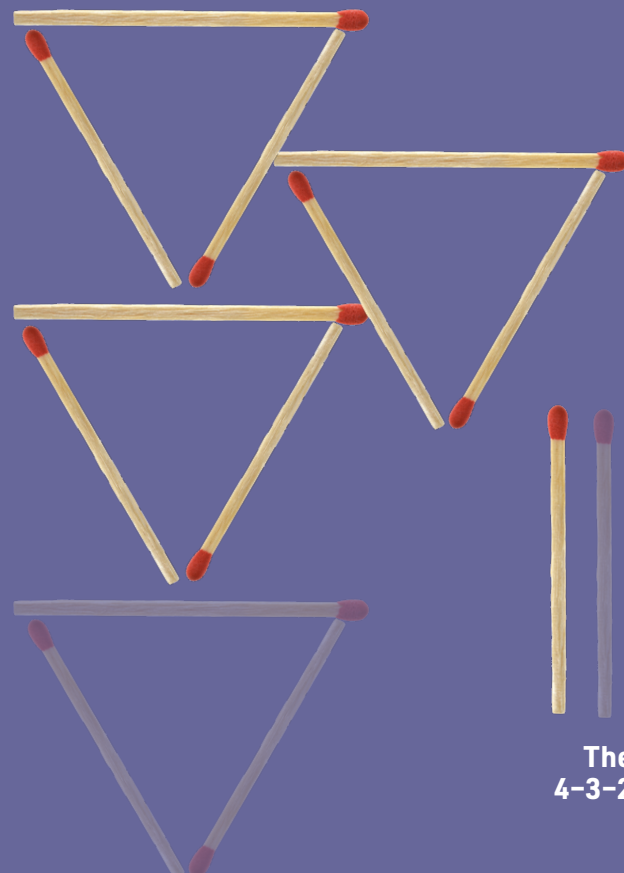

Move three matchsticks to make four squares

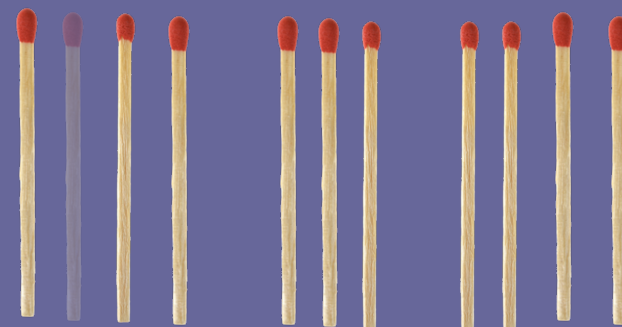

Move three matchsticks to make three squares

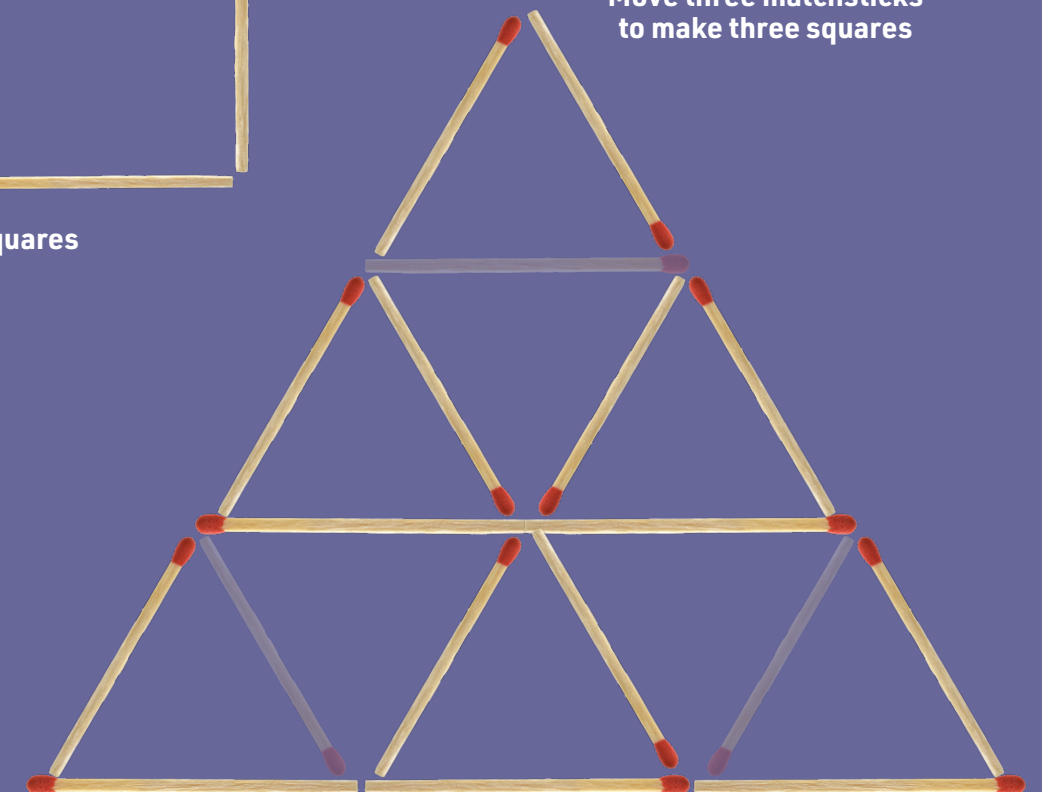

Remove four matchsticks to leave just three triangles

Move three matchsticks—no overlapping—to make four equilateral triangles

The current arrangement is, left to right, 4-3-2-1. Move just one matchstick to change the arrangement to 1-2-3-4.

This arrangement forms thirteen triangles (nine small, three medium, one large). Remove three matchsticks to make four triangles.
