SERIES 28

# HiPer-D®

The MIL-DTL-24308 intermateable and intermountable connector with advanced environmental and EMI shielding performance

The Glenair Series 28 HiPer-D® connector is intermateable and intermountable with standard M24308 type D-Subs, and meets the need for improved performance in hostile environments. Unlike standard M24308 connectors with stamped steel shells, the HiPer-D® is precision-machined from aluminum or stainless steel. The dielectric inserts are made with thermoset epoxy for improved resistance to chemicals and are capable of withstanding 200°C continuous operating temperature. Aerospace-grade fluorosilicone grommets and face seals provide watertight sealing. Integrated grounding fingers provide superior electromagnetic compatibility. Best of all, the HiPer-D® is available in every standard and high-density M24308 layout as well as combo layouts integrating power and shielded contacts. Like all Glenair high-performance solutions, HiPer-D® is stocked for immediate same-day shipment.

# HiPer-D<sup>®</sup> Connectors and Accessories

## Table of Contents

### Introduction and Technical Reference

HiPer-D<sup>®</sup> product facts • shell plating options • materials and finishes • performance specification • space grade information

A

### HiPer-D<sup>®</sup> Standard and High Density Connectors

Crimp and PC tail environmental connectors with standard density #20 contacts and high density #22 contacts

B

### HiPer-D<sup>®</sup> Combo Connectors

Crimp and PC tail environmental connectors with #20 and #8 contacts for signal, power and RF applications

C

### HiPer-D<sup>®</sup> High-Speed Connectors

Crimp contact non-environmental connectors with #8 contacts ideally suited for high speed data transmission.

D

### HiPer-D<sup>®</sup> Contacts and Tools

Signal contacts, power contacts, coaxial contacts, crimp tools, insertion/extraction tools

E

### HiPer-D<sup>®</sup> Backshells and Accessories

EMI backshells, environmental backshells, protective covers, Sav-Con<sup>®</sup> connector savers, gender changers, hardware kits, and heatshrink boots

F

### HiPer-D<sup>®</sup> Panel Cutouts and Printed Circuit Board Footprints

Panel mounting dimensions and PC board mounting hole patterns for vertical, right angle signal and combo connectors

G

# SERIES 28 HiPer-D Subminiature Connector

The HiPer-D<sup>®</sup> connector is a M24308-type D-Subminiature connector with superior design features. Unlike standard M24308 connectors with stamped steel shells, the HiPer-D<sup>®</sup> connector features a one-piece machined shell. Rated for 200°C continuous operating temperature, the HiPer-D<sup>®</sup> features thermoset epoxy insulators. Aerospace grade fluorosilicone grommets and face seals provide environmental protection. The HiPer-D<sup>®</sup> is intermateable, intermountable and interchangeable with standard M24308 D-Sub connectors. A ground spring offers enhanced EMI/RFI protection.

### Enhanced Panel Mount Features

HiPer-D<sup>®</sup> connectors with O-ring and threaded mounting holes for watertight panel attachment. Guide pins are available for blind mate applications.

### Improved EMI Performance

HiPer-D<sup>®</sup> pin connectors with ground spring for consistent mating forces and low shell-to-shell resistance.

### Combo HiPer-D<sup>®</sup>

HiPer-D<sup>®</sup> with mixed size #8 and size #20 contacts for signal, power and RF applications

### Improved Board Mount Features

HiPer-D<sup>®</sup> PCB connectors feature threaded board attachment holes, integral standoffs and an EMI shroud on right angle tails.

### Product Features

- Environmental, crimp removable rectangulars
- Advanced temperature, vibration and EMC/electrical performance
- M24308/D-sub intermateable
- Standard and high density layouts
- Rugged machined one-piece shell

### Hi-Speed HiPer-D<sup>®</sup>

HiPer-D<sup>®</sup> with rear release, size #8: Coax, Twinax/Quadax and El Ochito contacts for **High-Speed** applications

### EMI backshells

HiPer-D<sup>®</sup> backshells are designed to optimize EMI performance and save weight.

## Plating Options

A

### ABOUT SERIES 28 HIPER-D® SHELL PLATING OPTIONS

HiPer-D® connectors are available with aluminum or stainless steel shells, plated with a variety of finishes to meet every application. These options include high performance cadmium-free finishes. The United States Department of Defense (DOD) has mandated the elimination of cadmium from DOD weapons systems because of toxicity concerns. The European Union has also restricted the use of cadmium on electronics equipment (RoHS).

In this catalog's ordering information you will find five preferred material and finish options: electroless nickel, yellow chromate over cadmium, nickel-PTFE, black zinc-nickel and passivated stainless steel. The table below shows selected additional options that are also available on any Series 28 HiPer-D® connector. Glenair offers the industry's widest selection of shell material and plating options with no minimum order quantity or setup charge.

HiPer-D® Aluminum Shell Plating Codes					
Shell Plating	Glenair Plating Code	Salt Fog (Hours)	RoHS Compliant	Conductivity	Typical Applications
Electroless Nickel	ME	96	Yes	Excellent	Space vehicles, missiles, avionics, unmanned vehicles, instrumentation. Corresponds to MIL-DTL-24308 Class K.
Nickel-PTFE	MT	500	Yes	Excellent	Harsh environment, soldier systems, communications equipment. Corresponds to MIL-DTL-24308 Code T.
Zinc-Nickel with Black Chromate	ZR	500	Yes	Good	Harsh environment, soldier systems. Corresponds to MIL-DTL-24308 Code K.
Cadmium with Olive-Drab Chromate	NF	500	No	Excellent	Harsh environment, military equipment.
Cadmium with Yellow Chromate	JF	500	No	Excellent	General purpose military equipment. Comparable to MIL-DTL-24308 Code F.
Black Anodize	C	336	Yes	Non-Conductive	Applications where EMI shielding is not required.
Gold	Z2	48	Yes	Excellent	Space. Corresponds to M24308 Class M.
Chem Film	E	48	No	Excellent	Avionics
Stainless Steel, Electroless Nickel	ZM	500	Yes	Excellent	Extreme environments where stainless steel is preferred for strength, corrosion resistance, and where high conductivity is desired.
Stainless Steel, Passivated	Z1	500	Yes	Good	Extreme environments where stainless steel is preferred for strength, corrosion resistance. Corresponds to MIL-DTL-24308 Class P.

## Standard Materials and Finishes, Performance Specification

A

Material and Finish		
Description	Material	Finish
Contacts	Copper Alloy	Gold (50 microin.) over nickel

Description	Requirement	Procedure
Water Immersion	No evidence of water penetration into mated connectors. No evidence of water penetration into an unmated panel mounted PCB receptacle. $\geq 100$ M $\Omega$ insulation resistance.	MIL-STD-810F Method 512.4 1 meter immersion 1 hour
Air Pressure	No detectable moisture. $\geq 100$ M $\Omega$ insulation resistance.	IEC-60512-7 Test 14b 0.4 bar overpressure 48 hours immersion at a depth of 150mm in 25° C tap water.
Ingress Protection	IP67 rating	IEC-60529
Vibration, Sine	No discontinuity of greater than 1 microsecond, no cracking, breaking or loosening of parts, plug shall not become disengaged from receptacle. Connectors shall meet electrical requirements after vibration test.	EIA-364-28 Test Condition IV 100 milliamp test current 10-2,000 Hz 20 g, 196 m/s <sup>2</sup>
Vibration, Random	No discontinuity of greater than 1 microsecond, no cracking, breaking or loosening of parts, plug shall not become disengaged from receptacle. Connectors shall meet electrical requirements after vibration test.	EIA-364-28 Test Condition V Letter E 100 milliamp test current 50-2,000 Hz 16.91 g rms 8 hours each axis
Mechanical Shock	No discontinuity of greater than 1 microsecond, no cracking, breaking or loosening of parts, plug shall not become disengaged from receptacle. Connectors shall meet electrical requirements after shock test.	EIA-364-27 Condition D IEC-60512-6-3 3 shocks X 3 axes X 2 directions = 18 shocks 2941 m/s <sup>2</sup> (300 g's), 3 ms, half-sine
Thermal Shock	No mechanical damage or loosening of parts. Following thermal shock, connector shall meet contact resistance, DWV, insulation resistance and shell-to-shell resistance requirements.	EIA-364-32 Test Condition IV IEC-60512-11-4 5 cycles consisting of -65° C 30 minutes, +25° C 5 minutes max., + 200° C 30 minutes, +25° C 5 minutes max.
Humidity, Cyclic (Damp Heat, Cyclic) (Moisture Resistance)	No deterioration which will adversely affect the connector. 100 meg-ohms minimum insulation resistance during the final cycle. Following the recovery period, connectors shall meet contact resistance, shell-to-shell resistance and DWV requirements.	EIA-364-31 Condition B Method III IEC-60512-11-12 80-98% RH 10 cycles (10 days) +25° C to +65° C Step 7b vibration deleted. 24 hour recovery period.
Mechanical Durability, at Ambient Temperature	No deterioration which will adversely affect the connector after 500 cycles of mating and un-mating. Connectors shall meet contact resistance, insulation resistance, shell-to-shell resistance, DWV, and mating and un-mating force.	EIA-364-09 IEC-60512-5 Test 9a

Maximum Mating Force, combo HiPer-D® connectors with size 8 and size 20 contacts	[(# of size 8 contacts) X 5.0 pounds] + [(# of size 20HD contacts) X .75 pounds] + [3.0 pounds]			EIA-364-13 Full complement of contacts 1 to 10 inches per minute travel rate
Magnetic Permeability	2 μ maximum.			EIA-364-54
Insert Retention	No dislocation of inserts from their original positions when subjected to an axial load of 60 pounds per square inch			EIA-364-35 Apply force at a rate of 10 pounds per square inch per second until specified pressure is reached.

## Space-Grade HiPer-D® Information

A

### Outgassing

- HiPer-D® connectors must be specially processed to meet ASTM E595 outgassing requirements.
- Modification codes are a convenient way to specify special outgassing bakeout or thermal vacuum outgassing.

Space flight equipment requires low-outgassing components in order to prevent degradation to optics and other sensitive instruments. The space industry has adopted a standardized test procedure, ASTM E595, to evaluate outgassing properties. In the ASTM test, material samples are heated to 125° C at a vacuum of  $5 \times 10^{-5}$  torr for 24 hours. The test sample is then weighed to calculate the Total Mass Loss (TML), which may not exceed 1.0% of the total initial mass. A collector plate is used to determine the Collected Volatile Condensable Material (CVCM), which may not exceed 0.1% of the total original specimen mass. HiPer-D® connectors contain nonmetallic materials such as rubber, plastic, adhesives and potting compounds which can give off gasses when subjected to a vacuum or high heat. Unless the connector is specially processed, the TML and CVCM can exceed allowable limits. Glenair is able to offer two bakeout processes which assure all materials comply with ASTM E595: a 48 hour oven bakeout at 175° C or a 24 hour thermal vacuum outgassing at 125° C. The table below shows suffix codes which specify outgassing processing.

### Connector Material and Finish for Space Applications

- Cadmium and silver plating are prohibited in space.
- Specify electroless nickel plating or gold plating on connector shells

Some types of metals are prohibited from space flight. "Cadmium, zinc, chemically coated cadmium or zinc, or silver shall not be used as a connector or contact finish" (NASA EEE-INST-002 Instructions for EEE Parts Selection, Screening, Qualification, and Derating). NASA recommends electroless nickel or gold plating on connector shells and gold plating for contacts.

### NASA Screening

- "Mission critical" connectors for space flight should undergo rigorous 100% final inspection.
- Modification codes are available to invoke special screening.

NASA recommends that connectors for space flight be specially screened. NASA EEE-INST-002 Instructions for EEE Parts Selection, Screening, Qualification, and Derating contains three levels of screening: level 1 for highest reliability, level 2 for high reliability and level 3 for standard reliability. Glenair suffix codes are available to invoke NASA screening. The table below shows these "Mod" codes which can also include outgassing processing.

NASA Screening Levels and Modification Codes			
NASA Screening Level	Special Screening Only	Special Screening Plus Outgassing Processing	
		48 Hour Oven Bake 175° C.	Thermal Vacuum Outgassing 24 hrs. 125° C.
Level 1 Highest Reliability	Mod 429B	Mod 429J	Mod 429C
Level 2 High Reliability	Mod 429	Mod 429K	Mod 429A
Level 3 Standard Reliability	(Use standard part number)	Mod 186	Mod 186M

A

### Residual Magnetism versus Magnetic Permeability

- HiPer-D® connectors have a magnetic permeability rating of 2  $\mu$
- 100% residual magnetism screening is available on request. NMB (200 gamma) is the preferred screening level.

Ever since the dawn of the Space Age, D-Subminiature connectors have been used in satellites and space vehicles. However, standard D-Subs with cadmium-plated steel shells are not suitable for space. The space industry, led by the Goddard Space Flight Center (GSFC), created specifications for gold-plated brass D-Sub connectors. These specs called for 100% residual magnetism screening, because D-Subs were sometimes used on magnetically sensitive instruments. NMB (200 gamma residual magnetism) and NMC (20 gamma) became the most widely specified levels of residual magnetism. Meanwhile, M83513 Micro-D connectors and various military circular connectors were also widely used on space programs. Unlike the D-Sub connector and its special residual magnetism screening, these other connectors simply had to meet a 2  $\mu$  magnetic permeability requirement. This requirement is easily met with conventional nickel-plated aluminum alloy connectors. Glenair's HiPer-D® connector meets the 2  $\mu$  permeability rating now considered acceptable for most space instruments. However, if 100% residual magnetism screening is required, Glenair can furnish NMB-rated connectors. Please contact Glenair for ordering information.

### Special Note on HiPer-D® Material Outgassing Properties

- Standard HiPer-D® connectors contain RTV silicones DC3140 and DC3145. These materials slightly exceed ASTM E595 outgassing limits, even after bakeout.
- Mod Codes 186 and 429 replace standard RTV with Dow Corning 6-1125 CV space-approved RTV.

Standard HiPer-D® connectors contain RTV silicone sealants. Testing has shown that these materials can exceed outgassing limits even when specially baked or thermal vacuum outgassed. All space-grade HiPer-D® connectors are manufactured with a special Dow Corning RTV specifically recommended for space flight. Whenever a space-grade modification code appears in the part number, the special RTV replaces the standard RTV. With this exception, a space-grade HiPer-D® is identical to a standard part except for screening and/or outgassing processing. Modification codes 186 and 429 assure that the RTV meets outgassing requirements.

## SERIES 28

# Hiper-D® Standard and High-Density Connectors

**G**lenair HiPer-D environmental connectors are intermateable with M24308/D-Sub style connectors featuring rugged one piece aluminum shells and optional EMI ground spring for improved signal integrity. Standard Density (#20) or High Density (#22) contacts are crimp terminated and rear releasable for easy replacement and offered on inline, rear panel mount and float mount connectors. Standard and low profile PC Board mount – straight and right angle – configurations are also available. 11 “standard” insert arrangements available. Mated connectors meet IP67 requirements.

### Product Features

- Environmental, crimp removable rectangular connector
- Advanced temperature, vibration and EMC/electrical performance
- M24308/D-Sub intermateable
- Fits panel and PCB footprint of M24308 D-Sub products
- Available in all 11 “standard” insert arrangements
- Standard Density (#20) and High Density (#22)
- EMI spring
- High temperature thermoset epoxy insulators
- Optional guide pins for blind mating

## 280-018P pin connectors with standard M24308 type mounting flange, crimp termination

HiPer-D® pin connectors feature crimp, rear-releaseable size #20 or #22 contacts. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features a rugged machined aluminum shell, waterproof sealing and optional ground springs for improved resistance to electromagnetic interference. Gold-plated size #20 contacts conform to M39029/64-369 and accept #20 to #24 AWG wire. Gold-plated size #22 contacts conform to M39029/58-360 and accept #22 to #28 AWG wire. Contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone face seal and rear grommet meet IP67 immersion requirement. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

### NOTES

- HiPer-D<sup>®</sup> connectors are available with a wide variety of materials and finishes. See [About Series 28 HiPer-D<sup>®</sup> Shell Plating Options](#) for additional choices. Glenair offers the industry's widest selection of plating and material choices with no setup charge, no minimum order quantity and no schedule impact.
- For panel cutout dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
- Connectors are supplied with crimp contacts per M39029. Contacts are not installed. Refer to [HiPer-D<sup>®</sup> Contacts and Crimp Tools](#) for contact part numbers, specifications, crimp tool information, and insertion/extraction tools.
- HiPer-D<sup>®</sup> connectors meet the requirements of MIL-DTL-24308 and are intermateable with standard M24308-type D-Subminiature connectors with corresponding contact arrangements and type.
- Additional electrical, mechanical and environmental specifications are listed in [HiPer-D<sup>®</sup> Product Specification](#).

## 280-019S socket connectors with standard M24308 type mounting flange, crimp termination

HiPer-D® socket connectors feature crimp, rear-releaseable size #20 or #22 contacts. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features a rugged machined aluminum shell and waterproof sealing. Gold-plated size #20 contacts conform to M39029/63-368 and accept #20 to #24 AWG wire. Gold-plated size #22 contacts conform to M39029/57-354 and accept #22 to #28 AWG wire. Contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone rear grommet meets IP67 immersion requirement. Shell has backshell attachment groove. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

## 280-020P panel mount pin connectors with O-ring mounting flange, crimp termination

Rear panel mount HiPer-D® pin connectors feature crimp, rear-releaseable size #20 or #22 contacts and O-ring for a watertight panel seal. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features a rugged machined aluminum shell, environmental sealing and optional ground springs for improved resistance to electromagnetic interference. #4-40 threaded mounting holes simplify panel attachment. Threaded holes on the rear of the connector allow attachment of HiPer-D® EMI backshells. Contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone face seal and rear grommet meet IP67 immersion requirement (mated). 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

## 280-030P float mount pin connectors for blind mating, crimp termination

280-030P HiPer-D® pin connectors feature stainless steel float bushings for blind mating. Attach to panel with #4-40 screws (not supplied with connector). Crimp, rear-releaseable size #20 or #22 contacts. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features a rugged machined aluminum shell, rubber seals and optional ground springs for improved resistance to electromagnetic interference. Threaded holes on the rear of the connector allow direct attachment of HiPer-D® EMI backshells. Contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone face seal and rear grommet meet IP67 immersion requirement (mated). 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

### NOTES

- HiPer-D® connectors are available with a wide variety of materials and finishes. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional choices. Glenair offers the industry's widest selection of plating and material choices with no setup charge, no minimum order quantity and no schedule impact.
- For panel cutout dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
- Connectors are supplied with crimp contacts per M39029. Contacts are not installed. Refer to [HiPer-D® Contacts and Crimp Tools](#) for contact part numbers, specifications, crimp tool information, and insertion/extraction tools.
- HiPer-D® connectors meet the requirements of MIL-DTL-24308 and are intermateable with standard M24308-type D-Subminiature connectors with corresponding contact arrangements and type.
- Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

## 280-031S float mount socket connectors for blind mating, crimp termination

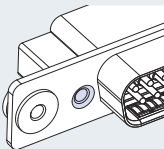

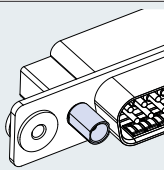

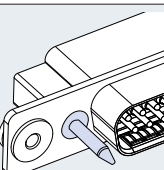

280-031S HiPer-D® socket connectors feature stainless steel floating bushings for blind mate applications. Attach to panel with #4-40 screws (not supplied with connector). Crimp, rear-releaseable size #20 or #22 contacts. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features a rugged machined aluminum shell and rubber grommet. Threaded holes on the rear of the connector allow attachment of HiPer-D® EMI backshells. Contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Connector meets IP67 immersion requirement. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

280-086 pin connectors with standard M24308 type mounting flange, integral banding platform and crimp termination

HiPer-D® pin connectors feature integrated banding platform, crimp, rear-releaseable size #20 or #22 contacts. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features a rugged machined aluminum shell, waterproof sealing and optional ground springs for improved resistance to electromagnetic interference. Gold-plated size #20 contacts conform to M39029/63-368 and accept #20 to #24 AWG wire. Gold-plated size #22 contacts conform to M39029/57-354 and accept #22 to #28 AWG wire. Contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone face seal and rear grommet meet IP67 immersion requirement. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

## 280-022P straight PC tail pin connectors with O-ring flange for rear panel mounting

Rear panel mount HiPer-D® pin connectors feature non-removable size #20 or #22 straight PC tail contacts and a flange O-ring for a watertight panel seal. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features a rugged machined shell, waterproof sealing and optional ground springs for improved resistance to electromagnetic interference. #4-40 threaded mounting holes simplify panel attachment. Threaded holes on the rear of the connector allow attachment to circuit board. Contacts are gold plated and potted with epoxy. Aluminum shell. Glass-reinforced thermoset epoxy insulator, fluorosilicone face seal. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

### NOTES

1. Contacts are factory-installed, non-removable and are potted with epoxy.
2. HiPer-D® connectors are available with a wide variety of materials and finishes. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional choices. Glenair offers the industry's widest selection of plating and material choices with no setup charge, no minimum order quantity and no schedule impact.
3. For panel cutout dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
4. For printed circuit board mounting dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
5. HiPer-D® connectors meet the requirements of MIL-DTL-24308 and are intermateable with standard M24308-type D-Subminiature connectors with corresponding contact arrangements and type.
6. Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

## 280-023S straight PC tail socket connectors with O-ring flange for rear panel mounting

Rear panel mount HiPer-D® socket connectors feature non-removable size #20 or #22 straight PC tail contacts and a flange O-ring for a watertight panel seal. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features a rugged machined shell, waterproof sealing and optional ground springs for improved resistance to electromagnetic interference. #4-40 threaded mounting holes simplify panel attachment. Threaded holes on the rear of the connector allow attachment to circuit board. Contacts are potted with epoxy. Aluminum shell. Glass-reinforced thermoset epoxy insulators. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

### NOTES

1. Contacts are factory-installed, non-removable and are potted with epoxy.
2. HiPer-D® connectors are available with a wide variety of materials and finishes. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional choices. Glenair offers the industry's widest selection of plating and material choices with no setup charge, no minimum order quantity and no schedule impact.
3. For panel cutout dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
4. For printed circuit board mounting dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
5. HiPer-D® connectors meet the requirements of MIL-DTL-24308 and are intermateable with standard M24308-type D-Subminiature connectors with corresponding contact arrangements and type.
6. Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

## 280-024P right angle PC tail pin connectors with O-ring flange for rear panel mounting

Right angle printed circuit board HiPer-D<sup>®</sup> pin connectors feature rugged one-piece machined aluminum shell and aluminum alloy cover for improved EMI protection. Contacts are non-removable size #20 or #22 PC tail contacts. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D<sup>®</sup> features environmental sealing and optional ground springs for improved resistance to electromagnetic interference. #4-40 threaded mounting holes simplify panel attachment. Threaded holes on the bottom of connector allow attachment to circuit board. Contacts are potted with epoxy. Glass-reinforced thermoset epoxy insulators, fluorosilicone face seal. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

## 280-025S right angle PC tail socket connectors with O-ring flange for rear panel mounting

Rear panel mount HiPer-D® right angle PC tail socket connectors feature rugged one-piece machined aluminum shell and aluminum alloy cover for improved EMI protection. Contacts are non-removable size #20 or #22. Flange O-ring provides panel seal. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features environmental sealing and optional blind mate hardware. #4-40 threaded mounting holes simplify panel attachment. Threaded holes on the bottom of the connector allow attachment to circuit board. Contacts are potted with epoxy. Glass-reinforced thermoset epoxy insulators. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

Materials and Finishes	
Shell	Aluminum alloy
Contacts	Copper alloy, 50 microin. gold plated
Insulators	Thermoset epoxy
Potting Compound	Epoxy
Interfacial Seal	Fluorosilicone rubber
Hardware	300 series stainless steel

Specifications	
Current Rating	#22 5 AMPS, #20 7.5 AMPS
Test Voltage	1000 VAC RMS
Insulation Resistance	5000 megohms minimum
Operating Temperature	-65° C. to +200° C.
Ingress Protection	IP 67
Shock	300 g.
Vibration, Random	43.92 g.

### NOTES

1. Contacts are factory-installed, non-removable and are potted with epoxy.
2. HiPer-D® connectors are available with a wide variety of materials and finishes. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional choices. Glenair offers the industry's widest selection of plating and material choices with no setup charge, no minimum order quantity and no schedule impact.
3. For panel cutout dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
4. For printed circuit board mounting dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
5. HiPer-D® connectors meet the requirements of MIL-DTL-24308 and are intermateable with standard M24308-type D-Subminiature connectors with corresponding contact arrangements and type.
6. Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

## 280-029S right angle PC tail socket connectors with low profile mounting flange

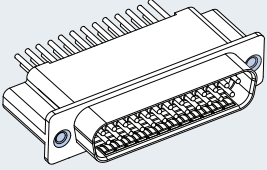

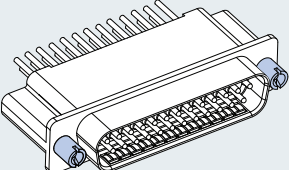

Low profile right angle PC tail HiPer-D® socket connectors feature rugged machined aluminum shell and aluminum alloy cover for improved EMI protection. Contacts are non-removable size, #20 or #22. Intermateable with standard M24308-type D-Subminiature connectors, the HiPer-D® features epoxy potting for environmental sealing. Threaded holes on the rear of the connector allow attachment to circuit board. Glass-reinforced thermoset epoxy insulators. 1000 VAC, 5 Amps (#22) or 7.5 Amps (#20).

SERIES 28

# Combo HiPer-D®

Now available—twenty power, signal, and RF combo arrangements. Tooled and ready for immediate application.

Combo D-subminiature M24308 connectors are ideally suited for use in analog signal, power, and RF applications. Glenair HiPer-D® connectors with combo layouts deliver both the flexibility and convenience of mixed size #8 and size #20 contact arrangements, as well as the high performance attributes of this ruggedized, environmental version of the M24308. Over 20 insert arrangements are available, including native size #8 as well as mixed size #8 and size #20. Crimp contact and PC board terminations are available with both standard and low profile shells. Designed for use in power controllers, radar systems, video applications and other military and aerospace electronic equipment. All HiPer-D® combo arrangements are tooled and ready for immediate application.

# SERIES 28 HiPer-D Combo Connectors

The Combo *Hi-Performance* D-Sub connector combines size #8 power or RF contacts with size #20 signal pins. The HiPer-D® meets the need for improved performance in hostile environments. Unlike standard M24308 connectors with stamped steel shells, the HiPer-D® connector features a one-piece machined aluminum shell. The thermoset epoxy insulators are capable of 200°C continuous operating temperature. Aerospace grade fluorosilicone grommets and face seals provide environmental protection.

### Product Features

- Size #8 Contacts
- 20 Contact Arrangements
- Closed Entry Insulator Protects Socket Contacts
- EMI Protection
- High Temperature Thermoset Epoxy Insulators
- Watertight Sealing
- Rugged Machined One-Piece Shell

## 280-046P combo cable pin connectors with standard mounting flange, crimp termination

Combo HiPer-D® pin connectors feature size #20 signal contacts and size #8 power or coax contacts. **Size #8 contacts are ordered separately.** The HiPer-D® features a rugged machined aluminum shell, waterproof sealing and optional ground springs for improved resistance to electromagnetic interference. Size #20 contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone face seal and rear grommet meet IP67 immersion requirement. 1000 VAC, 7.5 Amps (#20), up to 40 Amps with size #8 power contacts.

### NOTES

1. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional shell material and finish options. Glenair offers the industry's widest selection of plating options with no minimum order quantities or setup charges.
2. For panel cutouts, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
3. Connectors are supplied with size #20 crimp contacts per M39029. Contacts are not installed. Refer to [HiPer-D® Contacts and Tools](#) section for contact part numbers, specifications, crimp tool information, and insertion/extraction tools.
4. **Size 8 contacts are ordered separately.** Refer to [HiPer-D® Contacts and Tools](#) section for contact ordering information, specifications, crimp tool information, and insertion/extraction tools.
5. Combo HiPer-D® connectors meet the applicable requirements of MIL-DTL-24308 and are intermateable with standard non-environmental D Subminiature connectors with corresponding contact arrangements and type. **Size 8 contacts from other manufacturers cannot be installed in HiPer-D® connectors.**
6. Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

## 280-047S combo cable socket connectors with standard mounting flange, crimp termination

Combo HiPer-D® socket connectors feature size #20 signal contacts and size #8 power or coax contacts. **Size #8 contacts are ordered separately.** The HiPer-D® features a rugged machined aluminum shell, waterproof sealing and optional ground springs for improved resistance to electromagnetic interference. Size #20 contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone rear grommet meets IP67 immersion requirement. 1000 VAC, 7.5 Amps (#20), up to 40 Amps with size #8 power contacts.

### NOTES

1. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional shell material and finish options. Glenair offers the industry's widest selection of plating options with no minimum order quantities or setup charges.
2. For panel cutouts, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
3. Connectors are supplied with size #20 crimp contacts per M39029. Contacts are not installed. Refer to [HiPer-D® Contacts and Tools](#) section for contact part numbers, specifications, crimp tool information, and insertion/extraction tools.
4. **Size 8 contacts are ordered separately.** Refer to [HiPer-D® Contacts and Tools](#) section for contact ordering information, specifications, crimp tool information, and insertion/extraction tools.
5. Combo HiPer-D® connectors meet the applicable requirements of MIL-DTL-24308 and are intermateable with standard non-environmental D Subminiature connectors with corresponding contact arrangements and type. **Size 8 contacts from other manufacturers cannot be installed in HiPer-D® connectors.**
6. Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

# HiPer-D® Combo Connectors

280-048P panel mount pin combo connectors with O-ring mounting flange, crimp termination

Combo HiPer-D® pin connectors feature size #20 signal contacts and size #8 power or coax contacts. **Size #8 contacts are ordered separately.** The HiPer-D® features a rugged machined aluminum shell, waterproof sealing and optional ground springs for improved resistance to electromagnetic interference. Size #20 contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone face seal and rear grommet meet IP67 immersion requirement. 1000 VAC, 7.5 Amps (#20), up to 40 Amps with size #8 power contacts.

## NOTES

1. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional shell material and finish options. Glenair offers the industry's widest selection of plating options with no minimum order quantities or setup charges.
2. For panel cutouts, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
3. Connectors are supplied with size #20 crimp contacts per M39029. Contacts are not installed. Refer to [HiPer-D® Contacts and Tools](#) section for contact part numbers, specifications, crimp tool information, and insertion/extraction tools.
4. **Size 8 contacts are ordered separately.** Refer to [HiPer-D® Contacts and Tools](#) section for contact ordering information, specifications, crimp tool information, and insertion/extraction tools.
5. Combo HiPer-D® connectors meet the applicable requirements of MIL-DTL-24308 and are intermateable with standard non-environmental D Subminiature connectors with corresponding contact arrangements and type. **Size 8 contacts from other manufacturers cannot be installed in HiPer-D® connectors.**
6. Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

# SERIES 28 HiPer-D® Combo Connectors

## 280-089S combo cable socket connectors with standard mounting flange, integral banding platform and crimp termination

Combo HiPer-D® Combo-D connectors, with integral banding platform, feature size #20 signal contacts and size #8 power or coax contacts. **Size #8 contacts are ordered separately.** The HiPer-D® features a rugged machined aluminum shell and wire grommet for environmental protection. Size #20 contacts are packaged with connector. Terminate contacts with crimp tools purchased separately. Glass-reinforced thermoset epoxy insulators, copper alloy retention clips. Fluorosilicone rear grommet meets IP67 immersion requirement. 1000 VAC, 7.5 Amps (#20), up to 40 Amps with size #8 power contacts.

## 280-050P straight PC tail combo pin connectors with O-ring flange for rear panel mounting

The HiPer-D® is a high performance version of the M24308-type D-Subminiature connector. HiPer-D® connectors feature improved EMI performance and environmental sealing. Factory-installed PC tail contacts, integral board standoffs and threaded holes for attaching to circuit board. Optional ground springs for improved resistance to electromagnetic interference. Gold-plated copper alloy contacts, one-piece machined aluminum shell, glass-reinforced thermoset epoxy insulator, epoxy potting compound, fluorosilicone face seal and O-ring. 1000 VAC, 7.5 Amps (#20), up to 40 Amps with size #8 power contacts.

## NOTES

1. Contacts are factory-installed, non-removable and are potted with epoxy.
2. HiPer-D® connectors are available with a wide variety of materials and finishes. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional choices .
3. For panel cutout dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
4. For printed circuit board mounting dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
5. Combo HiPer-D® connectors meet the applicable requirements of MIL-DTL-24308 and are intermateable with standard M24308-type D-Subminiature combo connectors with corresponding contact arrangements and type.
6. Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

## 280-053S right angle PC tail combo socket connectors with O-ring flange for rear panel mounting

The HiPer-D® is a high performance version of the M24308-type D-Subminiature connector. HiPer-D® connectors feature improved EMI performance and environmental sealing and “closed entry” contact cavity for improved contact protection. Factory-installed PC tail contacts, integral board standoffs and threaded holes for attaching to circuit board. Gold-plated copper alloy contacts, one-piece machined aluminum shell, glass-reinforced thermoset epoxy insulator, epoxy potting compound, fluorosilicone O-ring. 1000 VAC, 7.5 Amps (#20), up to 40 Amps with size #8 power contacts.

## NOTES

- Contacts are factory-installed, non-removable and are potted with epoxy.
- HiPer-D® connectors are available with a wide variety of materials and finishes. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional choices.
- For panel cutout dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
- For printed circuit board mounting dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
- Combo HiPer-D® connectors meet the applicable requirements of MIL-DTL-24308 and are interchangeable with standard M24308-type D-Subminiature combo connectors with corresponding contact arrangements and type.
- Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

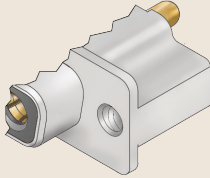

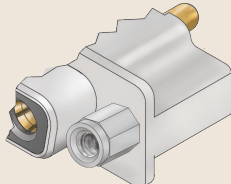

## 280-057S right angle PC tail socket connectors with low profile mounting flange

The HiPer-D® is a high performance version of the M24308-type D-Subminiature connector. HiPer-D® connectors feature improved EMI performance and environmental sealing and “closed entry” contact cavity for improved contact protection. Factory-installed PC tail contacts, integral board standoffs and threaded holes for attaching to circuit board. Gold-plated copper alloy contacts, one-piece machined aluminum shell, glass-reinforced thermoset epoxy insulator, epoxy potting compound. 1000 VAC, 7.5 Amps (#20), up to 40 Amps with size #8 power contacts.

### NOTES

1. Contacts are factory-installed, non-removable and are potted with epoxy.
2. HiPer-D® connectors are available with a wide variety of materials and finishes. See [About Series 28 HiPer-D® Shell Plating Options](#) for additional choices .
3. For panel cutout dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
4. For printed circuit board mounting dimensions, refer to [Panel Cutouts and Printed Circuit Board Footprints](#).
5. Combo HiPer-D® connectors meet the applicable requirements of MIL-DTL-24308 and are intermateable with standard M24308-type D-Subminiature combo connectors with corresponding contact arrangements and type.
6. Additional electrical, mechanical and environmental specifications are listed in [HiPer-D® Product Specification](#).

# HiPer-D® vs. ARINC 600

Smaller, lighter HiPer-Ds with robust EMI/grounding performance save weight, and reduce assembly time and complexity compared to conventional ARINC backplane/motherboard configurations.

Legacy ARINC 600 type solutions are no longer optimized for the size and weight reduction requirements of today's aircraft industry.

High-performance HiPer-D® connectors with their advanced EMI shielding, grounding, environmental sealing, and guide-pin-managed blind mate capabilities allow designers to implement a distributed architecture model with significant performance advantages.

Available HiPer-D® insert arrangements, from 9 – 104 way and supported contact types including size #22 and #20 signal as well as size #8 power and coax.

The opportunity to replace big, bulky and expensive ARINC 600 type rack-and-panel connectors with a distributed architecture utilizing discrete D-subminiature connectors is finally realized with the high-performance Glenair HiPer-D®. With the outstanding performance of the HiPer-D, system designers are now able to optimize available space in equipment consoles and boxes without compromising EMC or temperature tolerances. Distributed interconnect architectures of this type also allow for easier troubleshooting, and the ability to eliminate expensive motherboards and of course, cumbersome rack-and-panel ARINC connectors. The ability to separate out intrinsically safe functions—for example segregating power circuits completely from signal circuits—allows designers to build handier systems which are easier to assemble and maintain.

### Hi-Speed HiPer-D Connectors

#### 280-082P

Page D-6

The Hi-Speed HiPer-D<sup>®</sup> pin connector features a one piece rugged machined aluminum shell and an optional ground spring for improved resistance to electromagnetic interference. Supplied with a choice of coax, twinax, quadrax or Ochito (octaxial) contacts. Hi-Speed HiPer-D connectors are nonenvironmental.

#### 280-083S

Page D-8

The Hi-Speed HiPer-D<sup>®</sup> socket connector features a one piece rugged machined aluminum shell. Supplied with a choice of coax, twinax, quadrax or Ochito (octaxial) contacts. Hi-Speed HiPer-D connectors are nonenvironmental.

#### 280-101M and 280-098F

Page D-14

The Hi-Speed HiPer-D<sup>®</sup> connectors with SpeedMaster™ 10G contact modules utilize industry standard size 22D contacts. In-line connector shells are made from machined aluminum and available with 2 or 4 cavities. 280-101M is a cable plug while 280-098F is a cable receptacle.

#### 280-102M and 280-099F

Page D-16

The Hi-Speed HiPer-D<sup>®</sup> connectors with SpeedMaster™ 10G contact modules utilize industry standard size 22D contacts. Rear panel mount connector shells are made from machined aluminum and available with 2 or 4 cavities. 280-102M is a panel mount plug while 280-099F is a panel mount receptacle.

#### 280-103M and 280-100F

Page D-18

The Hi-Speed HiPer-D<sup>®</sup> connectors with SpeedMaster™ 10G contact modules utilize industry standard size 22D contacts. Float mount connector shells are made from machined aluminum and available with 2 or 4 cavities. 280-103M is a panel mount plug while 280-100F is a panel mount receptacle.

## Series 28 Hi-Speed HiPerD Connectors

Now available, HiPer-D® Connectors for high speed applications. Available with one to five cavities, these connectors accept size 8 coax, twinax, quadax and Ochito (octaxial) contacts. These M24308-style connectors fit standard D Subminiature panel cutouts. Rugged all-metal construction with optional EMI spring. Connector shell has keyway for contact orientation.

### *Product Facts*

- Ideally suited for high speed data applications
- Rugged machined one-piece aluminum shell
- For use with coax, twinax, quadax, and ochito contacts
- Easy contact installation and removal
- Fits panel footprint of M24308 D-Sub products
- Available in 5 contact arrangements
- Optional EMI ground spring

Construction	
■	Shell: aluminum alloy
■	Ground spring: beryllium copper, nickel plated
■	Retainers: aluminum aluminum alloy
■	Screws: stainless steel, passivated

The Hi-Speed HiPer-D® is a M24308-type connector with keyed cavities for size 8 coax, twinax, quadrax and El Ochito® contacts. The Hi-Speed HiPer-D® pin connector features a one piece rugged machined aluminum metal housing and an optional ground spring for improved resistance to electromagnetic interference. Easy contact installation and removal, no tool required. Aluminum retainers captivate contacts. Available with 1, 2, 3, 4 or 5 cavities, these high-density connectors provide size and weight savings compared to circular connectors. Hi-Speed, HiPer-D® connectors fit standard M24308 panel cutouts. Hi-Speed, HiPer-D® connectors are non-environmental.

### NOTES

- Connectors are supplied with unassembled contacts.
- 280-082P pin connectors are intermateable with cable-mount 280-083S socket connectors and with 280-085S and 280-091S printed circuit board connectors.
- When rear panel mounting, order connector without hardware (N option) and order jackpost kit 289-015 separately.
- Connectors are compatible with HiPer-D® protective covers and 289T100 and 289T101 HiPer-D® backshells.

# Hi-Speed HiPer-D® Connectors

280-083S socket connector with for size 8 coax, twinax, quadrax and El Ochito® (octaxial) contacts

- Rugged machined one-piece shell
- Coax, twinax, quadrax, and El Ochito® contacts
- Easy contact installation and removal
- Fits panel footprint of M24308 D-Sub products

### Technical Data

#### Specifications

- Operating temperature: -65 °C. to +200 °C.
- Durability: 500 mating cycles
- Shock: EIA-364-27 condition E
- Vibration: EIA-364-28 condition IV
- Humidity: EIA-364-31 condition 4
- Salt spray: EIA-364-26 condition B
- Maximum Mating Force:
  - shell size 1: 10 lbs.
  - shell size 2: 17 lbs.
  - shell size 3: 28 lbs.
  - shell size 4: 39 lbs.

#### Construction

- Shell: aluminum alloy
- Retainers: aluminum alloy
- Screws: stainless steel, passivated

The Hi-Speed HiPer-D® is a M24308-type connector with keyed cavities for size 8 coax, twinax, quadrax and El Ochito® contacts. The Hi-Speed HiPer-D® socket connector features a one piece machined aluminum shell. Easy contact installation and removal, no tool required. Aluminum retainers captivate contacts. Available with 1, 2, 3, 4 or 5 cavities, these connectors provide size and weight savings compared to circular connectors. Hi-Speed, HiPer-D® connectors fit standard M24308 panel cutouts. Hi-Speed HiPer-D® connectors are non-environmental.

### Ordering Information

Sample Part Number	280-083S	4T5	MT	N	-01
Basic Part Number	280-083S				
Shell Size- Insert Arrangement	See Table 1				
Shell Finish <i>(See Section A for Additional Finishes)</i>	ME = Electroless Nickel MT = Nickel-PTFE Z2 = Gold over Electroless Nickel JF = Yellow Chromate over Cadmium				
Mating Hardware <i>(See Table 3 for details)</i>	N = No Hardware (Through-Hole) P = #4-40 Female Jackpost L = Captive Jackscrew, Hex Head, Low Profile K = Slot Head Jackscrew, Extended Length S = Screwlock, Male, Hex Head, Low Profile T = Screwlock, Male, Slot Head, Extended Length				
Hi-Speed Contact Option	See Table 2 for contact dash numbers. Omit if ordered less contacts.				

Table 1  
Shell Size – Insert Arrangement

### NOTES

- Connectors are supplied with unassembled contacts.
- 280-083S socket connectors are intermateable with cable-mount 280-082P pin connectors and with 280-084P and 280-090P printed circuit board connectors.
- When rear panel mounting, order connector without hardware (N option) and order jackpost kit 289-015 separately.
- Connectors are compatible with HiPer-D® protective covers and 289T100 and 289T101 HiPer-D® backshells.

NEXT-GENERATION

# SpeedMaster™ 10G

## High-speed, repairable IFEC connection system

Newly developed SpeedMaster™ 10G is purpose-designed to meet the performance requirements and installation/use preferences of aerospace industry IFEC manufacturers. Optimized for high-speed Cat 6A Ethernet performance, the SpeedMaster™ 10G system offers industry-leading NEXT, return loss and insertion loss performance due to its highly-engineered isolation and separation architecture. Easy to assemble, terminate, install and repair, the SpeedMaster™ 10G utilizes size #22D contacts, tools, and cable, and meets the broad range of aerospace industry requirements for vibration, temperature cycling, durability, and safety performance.

- Utilizes aerospace industry standard #22D contacts, tools and widely available Ethernet flight cable
- Fast, easy termination
- Significant weight reduction compared to Quadrax solutions (reduces cable requirement by ½)
- High-density, repairable solution—ideally suited for today's networked IFEC environments

Mighty Mouse Locking Push/Pull Plug and Receptacle

HiPer-D Rectangular (M24308)

SuperNine® Plug and Receptacle

SERIES 28

# Hi-Speed HiPer-D® Connectors

## Repairable IFEC 10G Connection System

### The SpeedMaster™ Difference

SpeedMaster™ the high-speed multi-contact solution for the Mighty Mouse, HiPer-D, SuperNine 38999 type family of connectors. Each SpeedMaster™ module consists of 4 pairs of pins or sockets incorporating industry standard, size 22D contacts to provide 10G performance. Contacts are crimp terminated for easy replacement. Each module is individually sealed within the shell, and retained in place with a threaded ferrule. Additionally, module cavities are genderless allowing a pin or socket interface for plugs or receptacles. These features result in a two fold benefit. An easily removable and repairable contact makes this high-performance, robust connector an excellent choice for reducing network downtime and improving overall network performance. Additionally Glenair offers this robust connector in 3 connector packages, including our small form factor Mighty Mouse Series 824 Locking Push / Pull, HiPer-D (M24308) rectangular D-Sub, and our 38999 type “better than QPL” connectors allowing you to custom fit your application needs. Meet the demand for next generation IFEC networks with SpeedMaster™, the next generation contact system from Glenair.

### SPEEDMASTER™ 10G NEXT-GENERATION IFEC CONNECTION SYSTEM

SpeedMaster™ 10G modular inserts are available for Series 23 SuperNine – 38999, Series 80 Mighty Mouse – Locking Push / Pull and Series 28 HiPer-D – M24308 rectangular D-Sub connectors

The SpeedMaster™ 10G is optimized for high-speed / Ethernet performance and incorporates standard M39029 #22D contacts isolated for superior NEXT, return loss and insertion loss performance

### SPEEDMASTER™ MODULE MATERIAL/FINISH

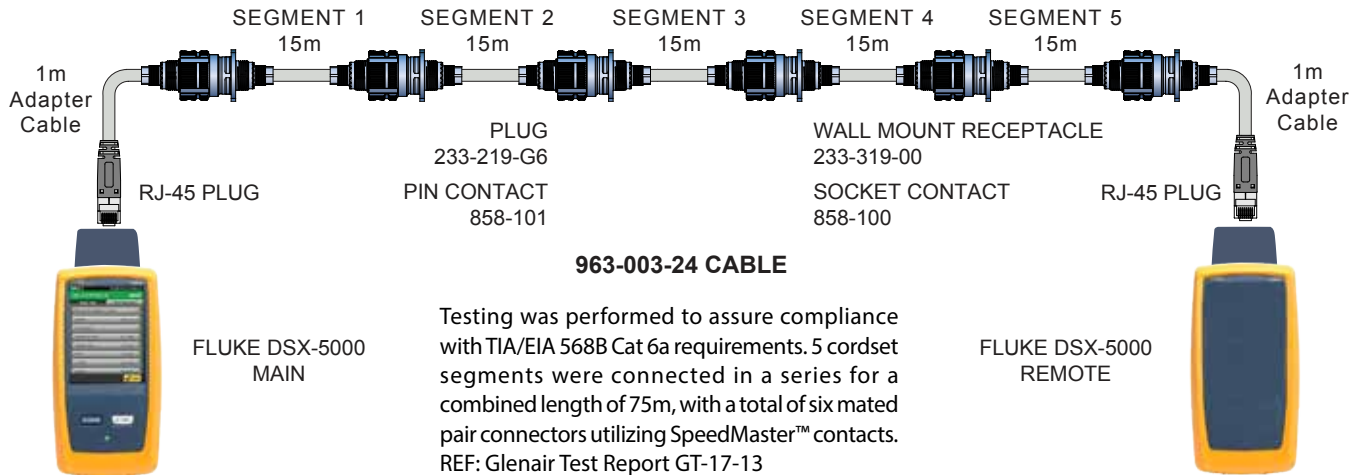

- IMPORTANT: SpeedMaster™ high-speed modules are only designed to be installed in "Glenair SpeedMaster™ series connectors."**
- High-speed module is designed to accommodate cable with wire insulation up to Ø.055 inches and cable jackets up to Ø.280 inches. See cables table for suggest list.
- For cables in-between sizes, select smaller size.
- See AI85082 for assembly instructions
- Tools Needed:
  - M39029/57-354 contacts:
  - Basic tool M22520/2-01 (Glenair P/N 809-015)
  - Positioner, Daniels PN K41 (Glenair P/N 859-019)
- Material/Finish
  - Isolator body - copper alloy / electroless nickel.
  - Contacts - copper alloy / gold plated
  - Retention ferrule - copper alloy / electroless nickel.
  - Inner shield ferrule: copper alloy / electroless nickel.
  - Insulators - rigid dielectric / N.A.
  - O-rings/grommets - fluorosilicone blend / N.A

Glenair offers Mil-Spec M24308 rectangular connector compliant contacts and the tools necessary to properly terminate, maintain, and replace them. Our high availability business model ensures contacts are always in stock, helping you avoid costly equipment downtime – with no dollar or quantity minimums. In addition to the broadest selection and availability, Glenair also delivers outstanding interconnection compatibility. Glenair QPL SAEAS39029 contacts are guaranteed to mate properly and perform at the upper limits of application and specification requirements.

Socket Contact

#### Material and Finish

Copper alloy, 50-100 microinches gold plated per ASTM B488 Type II Code C Class 1,27 over nickel plate per QQ-N-290 Class 2, 50-150 microinches.

Socket contact hood: 305 CRES, passivated.

#### Specifications

**AWG Wire Accommodation:** #20 - #24

**Current Rating:** 7.5 Amps maximum

**Voltage Drop** (at 7.5 Amps and 25° C, #20AWG silver-plated wire):  
55 millivolts maximum

**Temperature Range:** -65° to +200° C.

**Socket Min. Separation Force:** 0.7 ounces

See SAE AS39029 for additional electrical, mechanical and environmental specifications.

#### Crimp Tools and Insertion/ Removal Tools

Crimper: 809-015 (M22520/2-01)

Positioner: 859-016 (M22520/2-08)

Insertion/Removal Tool: 859-017

(M81969/39-01)

#20 contacts accept #20 to #24 AWG wire. These gold-plated copper alloy contacts meet the requirements of SAE AS39029. Use with all Series 28 HiPer-D® crimp connectors with size #20 cavities.

## #8 power contacts for combo HiPer-D® connectors

### #8 POWER CONTACTS FOR COMBO HIPER-D CONNECTORS

These size #8 contacts snap into Glenair combo HiPer-D® size #8 cavities and can be removed with a plastic extraction tool. Crimp termination. Two sizes are available, #0812 for AWG 12-14 wire, and #0816 for AWG 16-18 wire. Gold plated copper alloy, 1000 VAC DWV rating, 23 amp current rating. Optional sealing boot prevents moisture ingress. *Intermateable with standard D-Subminiature size #8 power contacts.*

### Insertion/Extraction Tool

Part Number
<b>809-132</b>
(M81969/14-04)

These coax contacts snap into Glenair combo HiPer-D® size #8 cavities and can be removed with a plastic extraction tool. Crimp termination. 75 ohm nominal impedance, DC - 3GHz frequency range. Use with RG179 coax cable or high bandwidth PIC cable for RS170 or SMPTE 292M video. Gold plated copper alloy, fluoropolymer dielectric. 1000 VAC DWV rating, 3 amp current rating. Optional sealing boot prevents moisture ingress. *These contacts are designed for use only with Glenair Combo HiPer-D® connectors and cannot be installed in other connectors.*

## 75 ohm high performance coaxial cable

### 75 OHM HIGH PERFORMANCE COAXIAL CABLE

PIC™ brand video cable is specially designed and manufactured for reliable performance in aircraft systems and other harsh environments involving high temperature, EMI and corrosive materials. Improved strength, lower attenuation and better shielding compared with M17/94-RG179. Silver-plated conductor, foamed FEP dielectric, tinned copper braid, FEP or ETFE jacket. Skydrol resistant, RoHS compliant, meets FAA FAR Parts 23 and 25, Appendix F flammability, complies with MIL-DTL-17.

**1** 75 ohm coaxial cable for RS170 video applications. 50 dB shielding effectiveness. Tinned copper braid shield. Red FEP jacket.

**2** 75 ohm coaxial cable for RS170 video applications. 90 dB shielding effectiveness. 100% coverage aluminumized plastic foil under tinned copper braid shield. ETFE jacket, white.

**3** 75 ohm coaxial cable for SMPTE 292M video applications. 110 dB shielding effectiveness. 100% coverage helical copper strip under tinned copper braid shield. ETFE jacket, white.

### Material and Finish

**Body and Contact:** Copper alloy, 50 microinches gold over nickel.

**Dielectric:** PTFE

**Cable Insert:** Brass, 50 microinches gold over nickel.

**Sealing Boot:** Thermoplastic and Fluorosilicone

### Specifications

**Impedance:** 50 ohms

**Frequency:** DC - 18 GHz

**VSWR:** 1.10 + (.01 X Freq GHz)

**Insertion Loss:** .06 X SQRT(Freq GHz)

**RF Leakage:** -(90 - Freq GHz)

**Temperature Range:** -65° to +200° C.

**Dielectric Withstanding Voltage:** 1000 VAC

**Insulation Resistance:** 5 gigohms

**Mechanical Durability:** 500 Mating Cycles

**Center Contact Retention:** 2 lbs. min.

**Maximum Engaging Force:** 2.5 lbs.

**Minimum Separation Force:** 0.5 lbs.

### ASSEMBLY INSTRUCTIONS

- Slide sealing boot onto coaxial cable.
- Strip cable as shown.
- Pre-tin cable braid.
- Break edge of center conductor as shown.
- Push cable into contact body. Center conductor should be seated into center contact.
- Solder cable braid to contact body as shown in Pin Contact illustration above.
- Snap assembled contact into connector and slide sealing boot into place.

## Crimp tools for terminating HiPer-D® contacts

### CRIMP TOOL FOR STANDARD HIPER-D® CONTACTS AND COAXIAL INNER CONTACTS

Precision mil spec crimp tool performs precision eight indent crimps for gas-tight wire terminations and excellent tensile strength. Adjustment wheel has 8 settings. Ratchet mechanism prevents improper crimps. Use with bayonet-type positioners, ordered separately. Check calibration with M22520/3 gages. Length is 6.75 inches, weight is approx. 10 oz.

### CRIMP TOOL FOR TERMINATING COAXIAL SHIELD CRIMP SLEEVE

**A** Parallel action tool for use with hex crimp dies. 11 inches OAL, 2.0 pounds. Anodized aluminum frame, steel mechanism, plastic handles. Includes tool for die set removal. Accepts all M22520/5 die sets.

**B** M22520/5-03 hex die set for terminating coaxial shield to outer body of coaxial contact. Set consists of upper and lower halves. Made of hardened steel with black oxide finish. Die set has two closures: .105 (2.67) hex across flats and .128 (3.25).

**C** Ratcheting crimp tool for terminating coaxial shield crimp sleeve. Use with 75 ohm contacts 852-086-02 and 852-087-02. 9.75 inches OAL, 1.25 pounds.

**D** Positioner for use with 809-133 crimper. Use with 75 ohm contacts 852-086-02 and 852-087-02.

### GROMMET SEALING PLUGS FOR SIZE #22 AND #20HD CONNECTORS

Grommet sealing plugs are used to seal unwired contact cavities. These plugs conform to MS27488 requirements. After installing unwired contacts into unused cavities, insert knob end of sealing plug into grommet until it bottoms against the unwired contact per illustration. Install sealing plugs with standard contact insertion/extraction tools.

## Conductive dust caps for HiPer-D® connectors 289-052

### CONDUCTIVE DUST CAPS

Black plastic conductive dust caps fit HiPer-D® and M24308-type D-subminiature connectors. Molded in conductive polyethylene copolymer (EVA), these caps provide electrostatic discharge protection to sensitive equipment. 140°F maximum service temperature. These caps meet the static decay requirement of MIL-PRF-81705. Surface resistivity is less than  $1 \times 10^5$  ohms/square. Integral lip allows easy removal.

# SERIES 28 HiPer-D® Accessories

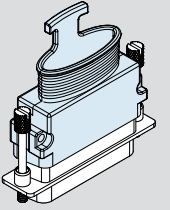

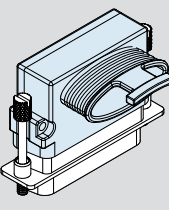

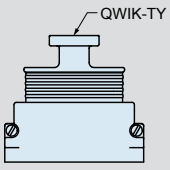

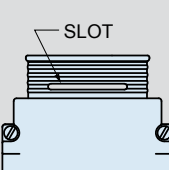

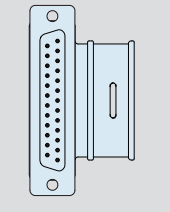

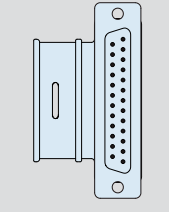

Low-Profile EMI Backshell, two-piece, elliptical entry, non-environmental  
289T005 top entry, 289S005 side entry

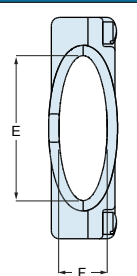

**289T005**  
**289S005**

Lightweight, low profile space-saving two piece backshell fits securely into groove in HiPer-D® connectors. Fits standard HiPer-D® pin and socket connectors (280-018P, 280-019S) and Combo HiPer-D® connectors (280-046P and 280-047S). Terminate cable shield with optional Band-Master™ATS clamping band. Elliptical cable entry provides room for large wire bundles. Machined aluminum alloy or stainless steel backshell consists of two interlocking housings and two 300 series stainless steel screws. Overlapping seam improves EMI shielding performance. Compatible with Glenair Series 77 lipped heat-shrink boots. Non-environmental.

289T008 top entry, 289S008 side entry

289T008  
289S008

289-008 backshell provides watertight EMI protection for HiPer-D® connectors. Fits standard HiPer-D® pin and socket connectors (280-018P, 280-019S) and Combo HiPer-D® connectors (280-046P and 280-047S). Available with top entry or side entry. Terminate cable shield with optional Band-Master™ATS clamping band. Elliptical cable entry provides room for large wire bundles. Backshell consists of solid one piece housing, two stainless steel hex head jackscrews, two jackscrew retainer clips and silicone rubber sealing gasket. Aluminum or stainless steel. Use with Glenair Series 77 heat-shrink boot.

## Jackpost Kits

### 289-015 and 289-016

#### 289-015 JACKPOST KIT FOR HIPER-D® CABLE CONNECTORS

Jackpost kits for panel mounting of HiPer-D® cable connectors. 289-015 jackposts fit HiPer-D® cable connectors 280-018P, 280-019S, 280-046P and 280-047S. For front-mounted and cable-mounted connectors, use 289-015-A. For rear panel mounted connectors, choose the correct jackpost based on panel thickness. #4-40 UNC 2B threads. One kit consists of (2) jackposts, (2) hex nuts and (2) split lockwashers. 300 series stainless steel, passivated.

289-015

Hiper-D Jackpost Kits for Cable Connectors				
Panel Thickness		Part Number	A	
In.	mm.		In.	mm.
(none)	(none)	289-015-A	.250	6.35
.031	0.79	289-015-B	.219	5.56
.047	1.19	289-015-C	.203	5.16
.062	1.57	289-015-D	.188	4.78

.125 <sup>(1)</sup>	3.18 <sup>(1)</sup>	289-015-D	.188	4.78

Note (1) Panels thicker than .062 (1.57) must be counter-bored.

#### 289-016 JACKPOST KIT FOR LOW PROFILE PCB CONNECTORS

289-016

Stainless steel jackposts for panel mounting of low profile HiPer-D® PCB connectors. For freestanding connectors, use 289-016-A. For rear panel mounted connectors, choose the correct jackpost based on panel thickness. #4-40 UNC 2B threads. 300 series stainless steel, passivated. One kit consists of (2) jackposts. Install into connector flange with threadlocking compound (not supplied).

Hiper-D Jackpost Kits for PCB Connectors				
Panel Thickness		Part Number	A	
In.	mm.		In.	mm.
(none)	(none)	289-016-A	.250	6.35
.031	0.79	289-016-B	.219	5.56

.125 <sup>(1)</sup>	3.18 <sup>(1)</sup>	289-016-D	.188	4.78

Note (1) Panels thicker than .062 (1.57) must be counter-bored.

Jackpost General information		
Mounting torque	4-40 thread	5.0 - 6.0 inch pounds
Mating torque	4-40 thread	3.5 - 4.0 inch pounds

Guide pins, bushings and jackposts for panel mount connectors  
289-014-B, 289-014-G, and 289-014-P

**289-014-B GUIDE BUSHING KIT**

289-014

Part Number
<b>289-014-B</b>

Style "B" guide bushing for blind mate applications has #8-32 thread for installation into panel mount HiPer-D® connectors with corresponding #8-32 tapped flange. 300 series stainless steel, passivated. One kit consists of (2) bushings. Install with threadlocking compound. Mates with style "G" guide pin 289-014-G.

**289-014-G GUIDE PIN KIT**

Part Number
<b>289-014-G</b>

Style "G" guide pin for blind mate applications has #8-32 thread for installation into panel mount HiPer-D® connectors with corresponding #8-32 tapped flange. 300 series stainless steel, passivated. One kit consists of (2) guide pins. Install with threadlocking compound. Mates with style "B" guide bushing 289-014-B.

**289-014-P JACKPOST KIT**

Part Number
<b>289-014-P</b>

Style "P" jackpost has #8-32 thread for installation into panel mount HiPer-D® connectors with corresponding #8-32 tapped flange. 300 series stainless steel, passivated. One kit consists of (2) jackposts. Install with threadlocking compound. Mates with all standard #4-40 male screw locks and jackscrews.

# SERIES 28 HiPer-D® Accessories

## Sav-Con® D-subminiature connector saver 289-012

289-012

Prevent damage to expensive instruments and cables with Glenair HiPer-D® Sav-Cons®. One side is a pin connector and the other side is a socket connector. Low profile one-piece machined aluminum housing and ground spring protect circuits from EMI problems. Contacts are heavy gold plated for improved durability. Available in standard density and high density contact arrangements. Contacts are factory-installed. Pin mating face has fluorosilicone rubber seal. Choose electroless nickel or gold shell finish for avionics and space applications. Choose cadmium for compatibility with cadmium or zinc plated M24308 connectors, or choose nickel-PTFE for maximum corrosion protection. Other materials and finishes available on request.

### 289-012 SAV-CON MATERIALS, FINISHES AND SPECIFICATIONS

Specifications	
Current Rating	#20 7.5 AMPS, #8 40 AMPS
Test Voltage	1000 VAC RMS
Insulation Resistance	5000 megohms minimum
Operating Temperature	-65° C. to +200° C.
Shock	300 g.
Vibration, Random	43.92 g.

Materials and Finishes	
Shell	Aluminum alloy
Contacts	Copper alloy, 50 microinches gold
Insulator	Thermoset epoxy
EMI Spring	Copper alloy, nickel plated
Face Seal	Fluorosilicone rubber
Hardware	300 series stainless steel

### STANDARD AND HIGH DENSITY CONTACT ARRANGEMENTS (face view of pin connector)

# SERIES 28 HiPer-D® Accessories

## D-subminiature gender changer 289-057P, 289-058S

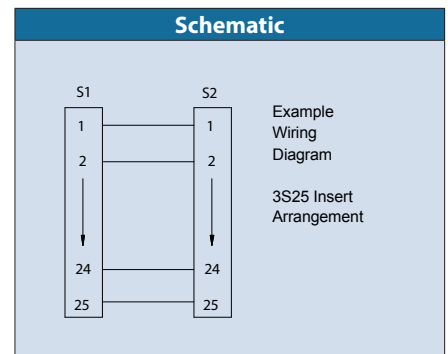

289-057P  
289-058S

HiPer-D® Gender Changers provide a convenient way to change the gender of an interface to allow attachment of a mismatched cable. Two styles are available: male-male and female-female. Machined metal housing protects circuits from EMI problems. Contacts are heavy gold plated for improved durability. Available in standard density and high density contact arrangements. Intermateable with standard M24308-type connectors. Pin mating face has fluorosilicone rubber seal. Choose electroless nickel or gold shell finish for avionics and space applications. Choose cadmium for compatibility with cadmium or zinc plated M24308 connectors, or choose nickel-PTFE for maximum corrosion protection. Other materials and finishes available on request.

## Band-Master™ ATS tool and bands for termination of cable braid 600-058 tool, 600-052 and 600-090 band straps

### BAND-MASTER™ ATS TOOL AND BANDS

Fast, cost-effective shield termination. Attach cable shields to backshells with **Band-Master™ ATS** 300 series SST/passivate I.A.W. AMS 2700. The **Band-Master™ ATS** system offers fast termination and the flexibility to handle a wide range of parts with just one band size. Approved for aerospace and defense, these straps have successfully passed rigorous shock, vibration and environmental testing.

**1** Band installation Tool. Use with .240" (6.10 mm) wide bands. 6.75 inches (172 mm) length, 1.2 pounds (0.6 Kg.)

**2** Standard Band, .240" (6.10 mm) wide. Available in two lengths, flat or pre-coiled. Stainless steel.

Figure	Description	Part Number
1	Band installation Tool	<b>600-058</b>

Figure	Length		Part Number		Accommodates Diameter	
	in.	mm	Flat	Pre-Coiled	in.	mm
2	14.250	362.1	<b>600-052</b>	<b>600-052-1</b>	1.8	45.7
2	18.000	457.2	<b>600-090</b>	<b>600-090-1</b>	2.5	63.5

Contact Glenair or visit our website (glenair.com) to view our complete line of **Band-Master™ ATS** products, including pneumatic tools for high volume production and calibration kits.

### BAND-MASTER™ ATS SHIELD TERMINATION INSTRUCTIONS

1. Prepare Cable Braid for termination process (Figure 1).
2. Push Braid forward over Adapter Retention Lip to the Adapter Incline Point (or .4" [10.2mm] minimum braid length). Milk Braid as required to remove slack and insure a snug fit around the shield termination area (Figure 2).
3. Prepare the Band in the following manner:
 

**IMPORTANT:** Due to Connector/Adapter circumference, it may be necessary to prepare the Band around the Cable or Retention Area.

  - A. Roll Band through the Buckle Slot twice. (Bands must be double-coiled.)
  - B. Pull on Band until Mark (▶) is within approximately .250 inch (6.4mm) of Buckle Slot (Figure 3). The Band may be tightened further if desired.

**NOTE:** Prepared Band should have (▶) Mark visible approximately where shown in Figure 3.

#### Shield Termination Clamping Process (Figures 4 thru 8)

**NOTE:** To free Tool Handles, move Holding Clips to center of Tool.

4. Squeeze Gripper Release Lever and insert Band into the front end opening of the Tool. (**NOTE:** Circular portion of looped band must always face downward.)
5. Aligning the Band and Tool with the Shield Termination Area, squeeze Black Pull-Up Handle repeatedly using short strokes until it locks against Tool Body. (This indicates the Band is compressed to the Tool Precalibrated Tension.)
 

**NOTE:** If alignment of band and shield is unsatisfactory, tension on band can be relaxed by pushing on slotted release lever on top of tool. Make adjustments as necessary and again squeeze black pull-up handle.
6. Complete the Clamping Process by squeezing the Gray Cut-Off Handle.
7. Remove excess band from tool and dispose.
8. Inspect Shield Termination.

## Elliptical D-subminiature heatshrink boots 770-030

### About User-Installed Adhesive

Heat-shrink boots are not watertight unless equipped with pre-coated or user-installed adhesives. When heat is applied to the boot, the adhesive melts and fixes the boot to the adapter and cable jacket to provide the necessary sealing as well as mechanical strain-relief. For maximum performance Glenair recommends Type U user-installed two-part epoxy adhesive which offers reduced boot installation time and easier installation. Pre-coated boots require additional care to install because the boot must be heated sufficiently to activate the epoxy, at the risk of overheating the overall assembly. A single 50 ml duo syringe can coat many boots. The duo syringe can be re-capped for re-use. Inexpensive mixing nozzles must be discarded after each use.

**NOTE: Glenair high-performance two part epoxy meets VG95343 part 15.**

See next page for ordering information on user-installed two part epoxy adhesive.

Series 77 "Full Nelson" Shrink Boot Catalog has additional boot styles, technical information, installation instructions and other heatshrink products. Contact Glenair or go to [www.glenair.com](http://www.glenair.com).

Elliptical heatshrink boots are designed for Glenair rectangular HiPer-D® backshells with large elliptical cable entries. Heatshrink boots provide strain relief and environmental protection. Shape-memory polymer returns to as-molded shape when heat is applied. Boot lip fits adapter groove for precise fit. Semi-rigid high performance elastomer resists high temperature and withstands exposure to petroleum-based fluids and fuels. Also available with non-halogenated flame-retardant polyolefin for use where limited fire hazard is required.

### MATERIAL SELECTION GUIDE

- 1 Type 1 High Performance Elastomer** -75°C to +150°C. Semi-rigid high performance elastomer combines excellent resistance to fuels, oils and solvents with superior performance at extreme temperatures. Material meets the requirements of VG95343 Type 6, BSG 198-5-DE, EN62329-102 and SAE AS5258 Type H. Recommended for demanding applications such as military vehicles and petrochemical exploration.
- 2 Type 2 Zero Halogen Polyolefin** -30°C to +135°C. Low Smoke Zero Halogen (LSZH) polyolefin boots meet low smoke and toxicity requirements of shipboard, transit and aircraft systems. Oxygen index greater than 30%, smoke index less than 20, and toxicity index under 3 per 100 grams. Material meets requirements of NAVSEA 5617649, VG95343 Part 29, BSG 198-5-DF, EN62329-101 and SAE AS5258 Type G. Good resistance to oils, fuels and solvents.

### PRE-COATED ADHESIVE SELECTION GUIDE

- W1 Low Smoke Zero Halogen (LSZH) polyamide hot melt adhesive Coating.** Bonds well to a variety of substrates. Good creep resistance at elevated temperatures. Excellent bond strength at low temperature. Good resistance to fuels and oils. -55°C to +105°C. Compatible with Type 1 and Type 2 boot materials.
- R High Temperature Epoxy Adhesive Coating.** Glenair's highest performance pre-coated adhesive. The material requires careful installation using trained operators. -75°C to 150°C. Withstands prolonged high temperature immersion in fuels and oils. Excellent peel adhesion. Compatible with Type 1 and Type 2 boot materials.

### 770-030 HEATSHRINK BOOT IDENTIFICATION MARKINGS

Heatshrink boots are identified with molded-in lettering. This lettering shows the boot type, boot size and orientation. Position the boot so that the lipped "A" end is toward the adapter and the "C" end is toward the cable. Assembly instructions are in the **Series 77 "Full Nelson" Environmental Shrink Boots** catalog, available at [www.glenair.com](http://www.glenair.com).

### USER-INSTALLED BOOT ADHESIVE, DISPENSING GUN AND MIXING NOZZLE

Part Number
<b>779-001</b>

High performance flexible two part thermoset epoxy provides high strength flexible bond from -55° to 150°C. 50 mL duo syringe fits standard dispensing guns. Use with square green mixing nozzle sold separately. 12 hour cure time at 20°C, 1 hour at 85°C, 30 minutes at 150°C. Apply to inside of boot with wooden spatula. 18 month shelf life.

Part Number
<b>779-002</b>

Twin push-rod 1:1 ratio epoxy dispensing gun for use with duo syringe epoxy and mixing nozzle sold separately. Durable heavy-duty plastic. Gun type hand grip with ratcheting trigger to advance push-rods.

Part Number	Count Per Pack
<b>779-003</b>	12

1:1 ratio mixing nozzle attaches to duo syringe with 1/2 turn and locks into place. Nozzle provides consistent mixing of resin and hardener. Kit consists of (12) nozzles.

SERIES GMLM

# MasterLatch™

## QUICK-DISCONNECT MICRO-D

MasterLatch (GMLM) Quick-release locking Micro-D connector pairs are equipped with a precision latching and locking mechanism. The single thumb latch on the plug side actuates a pair of locking latches that mate quickly and reliably to GMLM receptacles. These TwistPin equipped, low-insertion-force connectors meet all the standard performance requirements of MIL-DTL-8513 including vibration, shock, and mating durability. Choose from 7 different insert arrangements from 9 to 51 way. The unique ergonomic latching mechanism can be easily activated with a thumb and forefinger grip even when wearing gloves, or when difficult access to connector pairs makes the use of jacking hardware and tools impossible.

- Precision latch meets MIL-DTL-83513 vibration and shock
- Low insertion force TwistPin contacts
- Easy-to-activate latching mechanism

Face view pin connector - Micro-D contact arrangements

MasterLatch™ GMLM connectors are sold as prewired pigtailed only, with 18 inch wire leads. Contact factory for alternative lengths.

### MATERIAL AND FINISH

- Insulator: Liquid crystal polymer or PPS
- Wire: M22759/11 600 Vrms Teflon (TFE) or M22759/33 600 Vrms Modified Cross-Linked Tefzel (ETFE)
- Pin Contacts: Gold-plated beryllium copper alloy
- Socket Contacts: Gold-plated phosphor bronze alloy
- Shell: Aluminum alloy with choice of cadmium plate, electroless nickel, black anodize, gold, or chem film
- Latching mechanism: Stainless steel

# Why Choose **GLENAIR?**

Plenty of Raw Materials!

Outstanding  
Customer Service!

Abundant Machining Capacity!

In-House Assembly!

Huge "Same-Day" Inventory!

One of North America's  
and Machining

High-Production Injection Molding Equipment

State-of-the-Art Plating Capabilities

The Industry's Most Experienced EMI/RFI Braided Shielding Specialists

Largest CNC Milling Installations

Clean Rooms for Filter Array and Printed Circuit Board Assembly

*Out of This World*
